TITLE	Wisconsin Statewide School Performance Report, 1992-93. Bulletin No. 94272.
INSTITUTION	Wisconsin State Dept. of Public Instruction, Madison.
PUB DATE	Feb 94
NOTE	587p.
AVAILABLE FROM	Publication Sales, Wisconsin Department of Public Instruction, Drawer 179, Milwaukee, WI 53293-0179.
PUB TYPE	Statistical Data (110) -- Reports - Evaluative/Feasibility (142)
EDRS PRICE	MF03/PC24 Plus Postage.
DESCRIPTORS	*Academic Achievement; Advanced Placement; Attendance; Dropouts; *Educational Finance; *Elementary Secondary Education; Enrollment; Expulsion; Grade 3; Grade 8; Grade 10; High School Graduates; Profiles; Public Schools; *School Districts; Second Language Learning; Standardized Tests; *State Programs; Statistical Studies; Teacher Student Ratio; Testing Programs; *Test Results
IDENTIFIERS	ACT Assessment; *Wisconsin

ABSTRACT

This second statewide School Performance Report offers a snapshot of public education in Wisconsin during the 1992-93 school year. District-collected data make up the School Climate section, providing information on enrollment, attendance, suspensions, expulsions, retentions, dropouts, graduation and later education, and extracurricular and community activities. Also included are data and explanations of the Third Grade Reading Test, the Enhanced ACT assessment, and the Advanced Placement Test. Limited information is given about the new eighth- and tenth-grade examinations. The advanced coursework section includes details about advanced placement courses, the College Advanced Placement program, and courses considered advanced by the department, as well as foreign language offerings throughout the state. Two sets of information are included in the district profile text and data sections. These are staff and student ratios and credits required for high school graduation. The financial section provides information about school revenue and expenditures. The state's special-needs schools are discussed. Appendices present tables on school climate, test results, advanced coursework, district profile, and finance. A glossary is attached. (SLD)

Foreword

Education is at a crossroad, and only a concerted effort to realistically evaluate performance and tell the honest story will convince the public of the continued value of America's public schools.

This second statewide School Performance Report offers a snapshot of public education in Wisconsin during the 1992-93 school year. With the lessons we learned preparing the first report and the resulting modifications in data definitions and collection procedure, our snapshot is at the same time better focused and more panoramic.

It is, however, still only a picture of education—a moment in time. Any comparisons or rankings would be, at best, incomplete. More work remains to be done before the School Performance Report becomes the measuring stick against which all school and district performance can be measured, but it is evolving into that measure. Although it is becoming an excellent collection of data, that data is only one element in the assessment of a school's effectiveness. Statistics are not the only or even the best indicators of a child's success. We are working hard to determine the other pieces of the puzzle.

Because this report is but one tool that can be used to measure educational effectiveness, the Wisconsin Department of Public Instruction discourages the "ranking" of schools and districts based on these data. These statistics need to be considered in context with other information about demographics, family income and education, teacher training, school financing, and much more.

If nothing else, this statewide compilation of data—and the local reports that each district distributed in January—should generate renewed interest in public education. Yes, we need to applaud our many successes. More important, however, we need to talk about our problems, the breakdown of our society, and the trepidation with which we face the future. We need to talk about the high expectations we have for our children, our schools, and our society. And, most of all, we must work for the improvement of education by becoming partners with our schools, our educators, and our children.

If you have ideas on how to make this a more meaningful and accurate report, please call us toll-free at 800-441-4563. We want to hear from you, because the future of our children is at stake.

John Benson
State Superintendent

Acknowledgements

In its second year, the School Performance Report (SPR) is evolving into an excellent collection of information. Put into context with other information, programming, and expertise, it can also be a useful tool to determine the condition of education in Wisconsin. This accountability is critical, not to measure one school against another, but because we need to measure the present before we can plan for the future.

This document will continue to evolve as a tool to be used, not just a book to be read. Such an evolution will be a difficult task, as we fine tune the data collection and try to use the numbers to change education to help children. With the help of people with the interest of children upper most in their hearts and minds, the journey will be successful.

The key group in the journey is the staff in the schools and school districts throughout the state who collect the information needed for the School Performance Report and then use that information to publish the documents distributed locally to parents, guardians, and taxpayers.

Administrators and support staff from South Shore to Kenosha and from LaCrosse to Luxemburg-Casco have worked long and hard with Department of Public Instruction staff to make this project work. Much has been required of them.

- They have had to pay attention to data and statistics at a level of expertise they have never before had to meet.
- Many have been forced—some kicking and screaming and others willingly—into the computer age. Some have become experts, most have become proficient, and all have tried their best.
- Overworked staff members have found more hours in an already action-packed work week to spend on the telephone trying to figure out what went wrong and helping us fine tune the bugs and iron out the wrinkles.
- Most have shown the patience and sense of humor necessary to make a project of this scope succeed despite time and resource limitations that try the souls of men and women alike.

In the end, the School Performance Report will succeed because education professionals throughout Wisconsin worked very hard to get the job done. And, if this report succeeds and continues to evolve, the school children in the state will be the winners in the long run. You should all be proud of yourselves. Those of us in Madison who worked so closely with you appreciate your time and effort.

There are plenty of people at this end of the project who deserve acknowledgement, too. At the top of the list are Linda Zach and Barb Ballweg, irrepressible staffers of the School Performance Report Help Line. These two professionals spent countless hours on the telephone trying to improve the computer software, enhance technical training that occurred in many school districts, and reduce the inevitable frustration that comes with long hours and intense work. Many of those hours were over and above what was expected, and some came during late night telephone calls at home.

Additionally, the entire staff of the Bureau for Information Management (BIM) had an integral part in the 1992-93 report. The Office Technology group—Vicky Weasler, Lynn Kruchten, Sandra Zimmerman, Kathy Addie, Hazel Fedro, and Dianne Penman—not only put in overtime, but they sacrificed a weekend here and there to make it work.

This project continues to tread new ground, and much of it is in the field of data collection on computer diskettes rather than countless sheets of paper. BIM staffers—Chris Selk, Robert Busacker, Sam Bush, Jeff Jonietz, Kathleen Shannon, and Eleanor White—showed they are among the best as they helped sort out the bytes, bits, and gigs that make the software work.

The major difference between this year's report and last year's document is the increased interpretation of the information from the 1992-93 school year. Our theory is that data, no matter how pure, are only data until someone looks at it and explains what it means to children, schools, and education. Therefore, a new group was included in this year's School Performance Report mix, The Experts: Susan Ballard, Lois Brick, Paul Endres, William Erpenbach, Rajah Farah, Elizabeth Ford, Vicki Fredrick, Charles Misky, Stan Potts, Richard Russell, Nancy Scott, and Welda Swed.

Until the data and the interpretation was printed, this project was only work in progress. Expert publication help came from Greg Doyle, Debra Bougie, Gail Endres, Pam Crapp, Neldine Nichols, and Larry Post.

Susan Bleimehl went into the state's school districts with a message about the future. She told the story of how to use the WiseNet electronic bulletin board to submit and receive information, including the SPR.

No project of this magnitude, especially one that continues to break new ground, can be successful without key leadership. For the 1992-93 School Performance Report, that leadership was provided by Steven Dold, Juanita Pawlisch, Jane Grinde, and Ken Adler.

The staff of this project is not a large one. In terms of full-time availability, it is one person. For that reason, he is entitled to special acknowledgement. Although this report will continue to evolve into much more than a collection of data, that data is still the basis of the publication. Steven Sopcak has spent more than two years living and breathing the SPR. It hasn't always been easy, and everything he's tried hasn't worked every time. Through it all, Steve has kept that goal in sight, and he has done it with the style and patience needed in situations often packed with stress and frustration.

Thank you to all.

Introduction

In the beginning there was data, and the data was without form. Then, the data was given a purpose, and the School Performance Report was born.

* * *

Although this is only the second School Performance Report, major improvements have been made and many more are being considered. These changes will make the SPR a more accurate collection of data and a tool to help school districts work toward Wisconsin's educational goals for learners, institutions, and society.

The legislation establishing the SPR (s.115.38, Wis. Stats.) requires the Department of Public Instruction (DPI) to collect and report student data indicating advanced coursework, attendance, dropouts, expulsions, extra-curricular activities, graduations, postgraduation follow-up, retentions, school-sponsored activities, and suspensions. It also requires the DPI to measure student achievement statewide. This document publishes the results of the Third Grade Reading Test, the Enhanced ACT, and the Advanced Placement tests. Financial and staffing data and some curriculum information are also included.

Next year, the SPR will also collect and publish information on habitual truants and the results of assessments administered statewide to 8th and 10th graders.

We have made a good start. We are measuring for achievement. Experts agree, however, that standardized test scores often say more about the poverty or affluence of students and their families than about the educational quality of schools.

To meet these concerns, the SPR includes indicators of the condition of children as well as test scores. We have refined those indicators during the first two years of this project and will continue to work with them in future reports. Attendance, suspensions, outside activities, and the others are important, but they don't address the total condition of children, schools, parents, and society.

The keys to the future for schools and children are Wisconsin's educational goals. Not only do they establish outcomes for excellence, they do it in the three areas—learners, institutions, and society—that need to be addressed. It will be the SPR's job to collect, display, and interpret the indicators that best show progress toward these goals.

This report must be more than a measuring stick, however. It will establish the link between the goals and the curriculum and instruction that lead to implementation of the goals. In other words, the results of the School Performance Report should be the catalyst to help local districts align their strategies, instruction, and curriculum with the state's educational goals.

This evolution is also important because the indicators that are collected and presented serve as the foundation for local school district performance reports. And, as has been proved in the last two years, the local reports are the focus of the resurgent discussion about schools and young people.

Finally, the Legislature said the report would be one of the tools used to target low-performing districts for additional effort, services, and resources. For this reason, it is vital that the SPR indicators continue to evolve so that this assessment is fair and accurate.

Educational Goals for Learners

The learner will:

Build a substantial knowledge base
Develop thinking and communication processes
Apply knowledge and processes
Acquire the capacity and motivation for life-long learning
Develop physical and emotional wellness
Develop character
Be a responsible citizen
Be prepared for productive work
Respect cultural diversity and pluralism
Develop aesthetic awareness

How the report works

Data in this report comes from three sources: the Department of Public Instruction, private assessment firms, and school districts. The first two parts of the formula have been relatively easy, because the data are readily available.

Data collection at the district level, however, hasn't been quite as simple. Much of the first two years of the SPR project has been spent refining the collection process, including the development of computer software.

To this end, the schedule for the second year was similar to the first. Throughout the spring and summer, districts used the SPR user's manual and the computer software to collect the necessary data. Workshops were held throughout the state to help district personnel with this aspect of the report.

Diskettes were returned to the DPI in early September. During the following weeks we aggregated the districts' data and added information from assessment agencies and other DPI bureaus (fiscal, curriculum, and staff numbers).

That aggregated and augmented data—the SPR final publication diskettes—were returned to districts in November. That package also contained computer diskettes in several different formats to help district staff produce local performance reports. Again, our staff took to the highways and the byways of Wisconsin with patience and assistance.

Finally, the results of the effort were published. Districts sent local reports to parents, guardians, and taxpayers on January 1, and this document fulfills the DPI's mandate to publish a statewide summary.

Throughout the process, DPI staff maintained a School Performance Report telephone help line. It was busy, but not as busy as during the first year. We expect use of the help line to continue to decrease as DPI further refines the software and the districts become more familiar with the collection and importance of the data.

The tact taken by our staff has been to make the computer software more user friendly, while, at the same time, guaranteeing the accuracy of the data. That has been done by adding an automatic checks-and-balances system so district personnel enter information, but the software makes sure it falls within certain parameters.

Institutional Support Goals
Institutions will:

Focus on academic achievement
Set high expectations for students and schools
Address the needs of all students
Establish a climate of respect
Provide a wide range of educational offerings
Provide an active learning environment
Provide a positive physical setting for learning
Meet the needs of professional staff
Establish family partnerships
Promote collaboration within the school and community

Software for next year will have fewer dramatic changes than in the first two years. The 1993-94 version will contain on-line help, more understandable error messages, more useful directions, and the capability to produce reports that districts can make use of.

Information is getting better.

As the districts and the SPR staff have become more comfortable and familiar with the data collection, the number and severity of errors have decreased.

During the first year of the report, covering the 1991-92 school year, 421 of 428 school districts (not including the schools for the Visually Handicapped and the Deaf) and 1,990 of 2,028 schools submitted school climate information on 810,374 of the 814,671 K-12 students in the state. Even those numbers, however, didn't tell the entire story. Many of the computer diskettes that were received were unreadable and a lengthy list of numbers were outside of the realm of believability.

Between year one and year two, districts became better data gatherers. Additionally, the DPI did a better job by building checks and balances into the software. The results of those efforts have been impressive. The climate section of this report, which covers the 1992-93 school year, contains information gathered from 426 of 429 school districts (including the schools for the Visually Handicapped and the Deaf) and 2,018 of 2,030 schools, relating to the education of 99.989 percent (831,327 of 831,418) of the state's K-12 children.

What's in this document?

The 1992-93 School Performance Report contains introductory material, explanatory text, data tables, and a glossary. Text and tables are available for school educational climate statistics, assessment data, advanced coursework, district profiles, and fiscal information.

District-collected data make up the climate section. Included is information on enrollment, attendance, suspensions, expulsions, retentions, dropouts, graduation, postgraduation follow-up, extracurricular activities, and school-sponsored community activities.

Also included are data and an explanation of three assessments: the Third Grade Reading Test, the Enhanced ACT, and the Advanced Placement test. Text only is included on the 8th- and 10th-grade examinations, PLAN and EXPLORE. No data are listed because PLAN and EXPLORE were only used on an optional basis during the 1992-93 school year.

The advanced coursework sections of the SPR include details about courses offered by Advanced Placement, the College Advanced Placement Program, and those courses considered advanced by the DPI. This section also details foreign language course offerings throughout Wisconsin.

Two sets of information are included in the district profile text and data sections. The first deals with staff and student ratios, and the second part shows the credits required for graduation in all the state's high schools.

Finally, the financial portion of the SPR displays explanatory text and data about revenue and expenditures from state school districts. Unlike last year's document, this year's report includes fiscal information from the same year as the student data, in this case, the 1992-93 school year (the 1991-92 book contained 1990-91 fiscal data).

Societal Support Goals

Society will:

Make children its top priority
Provide fair and adequate funding for education
Provide safe schools, neighborhoods, and communities
Develop partnerships
Provide educational, cultural, and recreational opportunities
Enhance educational equity through information technology
Support local decision-making

Two additional sections of interest in this year's report are the glossary and a chapter dealing with the state's two residential facilities and other special-needs schools.

The future of SPR is the future of education

The Department of Public Instruction makes no attempt to rank schools or school districts based on the information in the SPR, because all of the information needed hasn't been collected. We need data on family education and structure, district tax base, teacher information, poverty level, and more.

Data, statistics, and information—and the comparisons to which they lead—are relevant, however. Such comparisons help all districts learn from the successes and failures of others. These types of comparisons are also important, because they lead to discussions which result in solutions to the problems faced by all schools and all children.

Although the SPR is developing into this type of comparative document, its future must be linked to Wisconsin's educational goals. We will continue to refine the project to measure progress toward the three goals and, equally as important, to bring the process full circle so information gathered and reported is used to change the instruction and curriculum that impacts on the goals.

By linking the School Performance Report and the goals, we hope to give all stakeholders in the state's educational system the information needed to put children and schools back in the spotlight. In this way, it becomes a starting point for serious and realistic discussion about the future of education rather than the political debate and rhetoric that have characterized the past.

The information included in the School Climate chapter of the 1992-93 School Performance Report provides a good snapshot of the education received by young people in Wisconsin. Use of these data in isolation, however, could offer an incomplete and distorted view of that educational experience.

To get a better picture of Wisconsin's schools, information on suspensions, retentions, expulsions, and dropouts should be analyzed collectively, because one action will, more often than not, trigger a series of actions.

For example, pupils who have behavioral problems are often truant or suspended from school. Continuing absence from school for any reason, including suspension, means a student, more often than not, will fall behind in school. As a student falls behind, he or she may be retained in grade and, all too frequently, drop out. Additionally, many suspended pupils are eventually expelled from school, and expelled students frequently do not return or, if they do, they fail to graduate.

Because of this interaction, school districts are encouraged to analyze suspension (in- and out-of-school), expulsion, retention, and dropout rates in combination. Whenever any of these rates approach the statewide averages, applicable policies and practices may merit review to determine if preventive strategies and interventions, including alternative education programs, are needed.

Interpretation of these data is difficult, because all school districts (K-12, K-8, and 9-12) are "lumped together" in the table. For example, comparing the suspension rate of a K-12 district with the rate of a union high school district, which has only 9th- through 12th-grade students, is not valid because suspensions are more likely to be used for disciplinary reasons as a pupil grows older.

Additionally, it is difficult to analyze these data in the absence of demographic and other student-profile information. Although statistics were collected for the School Climate tables by grade, ethnicity, and gender, they have not been displayed in this statewide

School Climate

report. The information, however, is summarized for each entry in this section.

It would also be helpful to have similar information about truancy in Wisconsin schools. These data were not collected during the first two years of the report, but beginning with the 1993-94 school year, truancy statistics will be included.

Finally, this report treats the Wisconsin School for the Visually Handicapped and the School for the Deaf as individual schools within separate school districts. For that reason, the total number of schools used in this report is 2,031 (rather than 2,029), and the total number of districts is 429 (rather than 427).

Enrollment

DISTRICT School	3rd Friday Enrollment (All Grades)
STATE AVERAGE OR TOTAL	831,418

What is it?

Enrollment taken on the third Friday in September is used throughout the School Performance Report. It is a count of pupils who:

- Are physically present in the school as of the third Friday in September.
- Have attended school at least one day prior to the third Friday and are expected to attend at least one day after the third Friday.
- Are enrolled at the school but currently receiving homebound services from the district.

Enrollment is a head count. Every pupil is counted as one, regardless of the amount of time spent in school.

What does it say?

Wisconsin public school enrollment for 1992-93 was 831,418, an increase of 16,747 students over 1991-92. This is the sixth year in a row that the number of children in our schools has increased. Total school enrollment for 1987-88 was 772,363; 1988-89 was 774,857; 1989-90 was 782,905; 1990-91 was 797,621; and 1991-92 was 814,671.

Most school districts in Wisconsin are small, but most Wisconsin children are educated in large districts (Figure 1). For example, the largest dozen school districts educate 30 percent of the children, and the largest 10 percent of the districts educate 50 percent of the children (Figure 2).

Many of the state's smallest districts were the 47 elementary districts, which operated grades kindergarten through 8 during the 1992-93 school year. Each elementary district feeds into one of the state's 10 union high school (UHS) districts (see explanation in finance section), which ran grades 9 through 12. If the UHS systems were 13-grade districts, several of them would be among the top 10 percent in size.

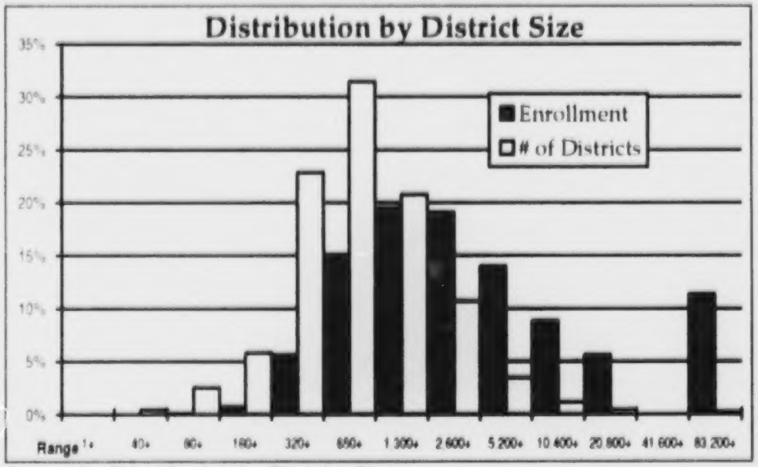

Figure 1: Distribution by District Size

1.	Milwaukee	94,258
2.	Madison	24,284
3.	Racine	22,239
4.	Green Bay	18,690
5.	Kenosha	17,006
6.	Appleton	13,636

10.	Sheboygan	9,745
11.	Oshkosh	9,517
12.	West Allis	9,098

Figure 2: The Dozen Largest Districts

The state average district enrollment was 1,938, but if the 10 UHS systems (the union high school and its associated grade schools) were considered as 13-grade districts, the average would have been 2,176.

Schools were much less varied in size. As expected, most children attended medium-sized school sizes. Of the largest 25 schools in the state in terms of enrollment, most were four-year high schools. Appleton West, Kenosha's Tremper and Bradford, Stevens Point Area Senior High, and Waukesha South ran only three grades. Neenah Shattuck was the only junior high (Figure 3).

The smallest schools were almost all for children with some kind of special need (i.e., school-age parenthood, learning disabilities, disruptive behaviors, etc.). A high staff-to-student ratio in these schools permits intensive attention to the children's individual problems. Average school enrollment was 409. Different types of schools, however, had different enrollment averages (Figure 4).

What does it mean?

Enrollments are on the rise in Wisconsin. In 1971-72, total Wisconsin public school enrollment reached an all-time high of 999,921. The next school year, the count began to decline, and enrollment bottomed out in 1984-85 at 767,542. For the following two years, enrollments remained stable, and then began to rise again in 1987-88. Counts have risen gradually to the 1992-93 total of 831,418.

Figure 4: Average Enrollment by School Type

The growth in enrollments in the late 1980s began at the elementary level with large numbers of pupils entering kindergarten for the first time. Small , across-the-board increases can be absorbed by most school districts with an additional pupil or two in a grade. If the increase is concentrated in the early grades, however, it means finding space for another elementary classroom or adding an aide or aides.

After six years of this type of growth, elementary classes continue to be large. Moreover, those first large classes are now at the middle level. The district that had 800 students in 1987-88—and grew by 12 students in 1988-89, 1989-90, 1990-91, 1991-92, and 1992-93—would now have 860 students at a bulging elementary building. Furthermore, the overflow has begun to move into the middle school.

It is interesting to note that the 1992-93 total state enrollment is nearly the same as the total in 1980-81. If Wisconsin enrollments continue to rise as they have since the late 1980s, the state will pass the 1 million mark by the 2004-2005 school year.

Districts that closed schools due to low enrollments a few years ago are now looking for space or facing the possibility of moving some elementary pupils to a middle school building and/or some middle-level pupils to a high school building.

Enrollment is a fluctuating number that, in Wisconsin, peaks every 30 years. By using this information for long-term planning, districts may be able to avoid empty classrooms one year and overfilled classrooms a few years later.

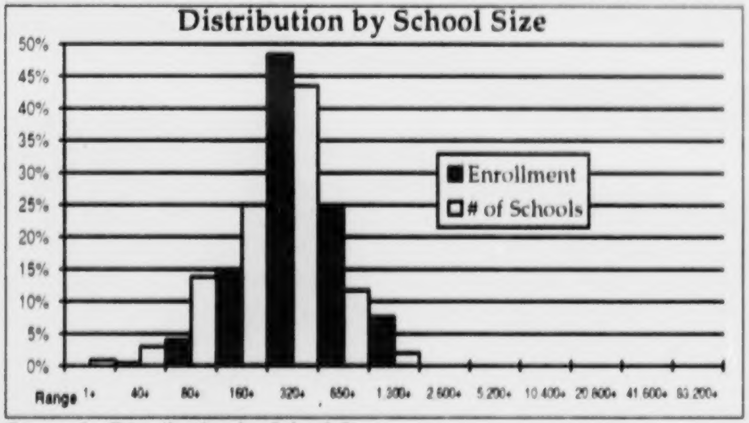

Figure 5: Distribution by School Size

Attendance

DISTRICT School	Attendance (All Grades)		
	Possible Days of Attendance	Actual Days of Attendance	Attendance Rate
STATE AVERAGE OR TOTAL	145,739,157.5	136,515,580.5	93.67

What is it?

A key component of academic achievement is attendance: the number of days of face-to-face contact between a student and an instructor. Although there is much more involved in learning than seat time in a classroom, it is clear that a child who isn't in school isn't learning what is being taught that day.

This report calculates the attendance rate of a school or district by dividing actual days of student attendance by possible days of student attendance. The smallest reportable unit of attendance schools used was one-half day.

What does it say?

Possible and actual days of attendance, as absolute numbers, are directly related to enrollment. Analysis of the former will be, therefore, similar to analysis of the latter.

Union Grove, a UHS district, had the top attendance rate (98.1 percent) in Wisconsin during the 1992-93 school year. This is impressive, because it operated only high school grades, and high schools usually have the worst attendance rates.

At the other end of the spectrum was the state's largest district, Milwaukee, with an attendance rate of 85.9 percent, nearly a full percentage point below the next lowest, Unity, at 86.83 percent. Three union high school districts were in the bottom 10 districts for attendance.

The best rates among individual schools were at West Allis' Horace Mann Middle School at 99.97 percent, New Auburn Elementary School at 98.91 percent, and Hudson Junior High School at 98.72 percent. Thirty-three schools, in addition to the six already mentioned, had attendance rates of 97.5 percent or better.

Three schools did report 100 percent attendance rates: Stevens Point Area Senior High Alternative High School, the Rock County Youth Home in Janesville, and the Barron County Handicapped Center in Rice Lake. All were low-enrollment, special-needs schools.

Lowest attendance rates were found mainly at schools for troubled youngsters. Scattered among these specialty schools were various Milwaukee high schools: North Division at 63.32 percent, Custer at 73.59 percent, South Division at 74.69 percent, and Vincent at 75.61 percent. Eight others reported attendance rates below 80 percent.

By grade, attendance rates were best at grade 4 (95.8 percent), then decline slowly until bottoming out in grade 9 (90.6 percent), before rebounding slightly for the rest of the high school grades. By race, attendance rates were: Asians around 96.0 percent, whites about 95 percent, Hispanics and Indians approximately 89 percent, and blacks around 86 percent. By sex, there wasn't much difference between the attendance rates of males and females.

What does it mean?

The statewide average attendance rate—the actual days all students were in school divided by the total number of days they could have been there—is 93.67 percent. If the usual school year is 180 days long, that means the average pupil missed about 11 days of school.

Some students, however, were out of school more, others less. That means that for every pupil who missed only three or four days there is another who missed 18 or 19 days during the year.

Asian pupils had an overall attendance rate of about 96.0 percent, and white pupils followed at about 95.0 percent. American Indian, Hispanic, and black pupils had overall attendance rates of 90.0 percent, 89.0 percent, and 86.0 percent, respectively. This means the average Asian pupil missed about seven days of school per school year, while whites missed about nine days, American Indians about 18 days, Hispanics about 20 days, and black youngsters about 25 days. Calculating attendance through the 12th grade, it is possible some students could miss almost two full school years during their K-12 experience.

By grade, attendance rates were very steady through 5th grade at just over 95 percent. From 6th through 9th grade, however, attendance rates dropped in each grade and bottomed out at just over 90 percent. In grades 10 through 12, attendance was once again steady at about 91 percent.

These figures show that elementary pupils missed about nine days during the 1992-93 school year, and middle-level pupils missed between 10 and 18 days per year. The average high school pupil missed about 16 days per school year.

These data are important because this type of analysis could impact educational decisions, especially in larger, more ethnically and economically diverse schools and districts. Whatever the implications, however, districts should have a formal absence policy to address such things as acceptable excuses, followup action to unacceptable excuses, steps in the followup process, absence notification, and follow-through procedures once an action is initiated.

The law only provides specifics on school days missed for truancy, which is defined as absence from school "without an acceptable excuse" for "part or all of 5 or more days out of 10 consecutive days on which school is held during a school semester," or "part or all of 10 or more days on which school is held during a school semester" (s.118.15, Wis. Stats.). The School Performance Report will collect information on habitual truants beginning with the 1993-94 report.

Suspension

DISTRICT School	Out-of-School Suspensions (All Grades)			
	No. of Pupils Suspended	No. of Suspensions	No. of Days Suspended	Suspension Rate
STATE AVERAGE OR TOTAL	**47,136**	**106,060**	**208,316.5**	**0.143**

What is it?

One sanction local school districts can use for disciplinary purposes is the suspension, which can be imposed in two forms: out-of-school (exclusion from school) and in-school (exclusion from the classroom). Only out-of-school suspensions are reported in the data section of this report.

Out-of-school suspensions can be imposed for up to three days, or, if notice of an expulsion hearing has been issued, up to 15 days. In-school suspensions can be used to address a multitude of less-serious disciplinary problems. Such suspensions can be served in various situations, ranging from school libraries to rooms designated only for students being disciplined.

Suspensions were reported at all grade levels. The suspension rate is calculated by dividing the number of days students are suspended by the possible days of attendance for all students (either in a school, district, or state).

What does it say?

During the 1992-93 school year in Wisconsin, 47,136 pupils were suspended 106,060 times for a total of 208,316.5 days lost to suspension. On the average, then, each pupil disciplined in this manner received 2.25 suspensions and lost 4.5 days.

Behind the averages, however, is a different story. Most pupils who are suspended are suspended only once and then just for a half or single day. Few pupils are repeatedly suspended for progressively longer periods.

Milwaukee has 13 percent of the total state third Friday student enrollment but accounts for 28 percent of the pupils suspended, 31.percent of the suspensions, and 39 percent of the days lost because of suspension. Thirty-one districts suspended 200 or more pupils, and 36 suspended none at all.

Among individual schools, 48 (27 of them in Milwaukee) suspended 200 or more pupils, and 766 suspended none.

The state average suspension rate for the 1992-93 school year was 0.143 percent. Of the 20 districts at or above 0.2 percent, eight are UHS districts. Wilmot, a UHS district, had the highest rate at 0.533 percent. Interestingly, Union Grove, which has the best attendance rate in the state, was seventh in suspension rate with 0.386 percent.

Bayfield, Racine, and Milwaukee are the K-12 districts with the highest rates, all over 0.4 percent.

Washington Center Middle School in Racine had the highest suspension rate, 9.138 percent, among individual schools. Twenty-five schools exceeded 1 percent, and an additional 396 schools were at or above 0.2 percent.

(The Cudahy Middle School corrected its suspension report too late to affect publication of the school climate tables. If the correct data had been used, the school's suspension rate would have been 0.32 percent.)

According to the data, suspensions seem to be used primarily for disciplining early adolescents. Suspension rates increase dramatically from the lowest grades to top out around 0.335 percent for grades 7 and 8 and then fall off steadily thereafter.

Boys are suspended approximately three times as often as girls. Black males are suspended far more than any other racial group (for example, 0.84 percent for black males compared to 0.13 percent for white males). Asian girls are least likely to be suspended (Figure 6).

What does it mean?

A thorough analysis of these data must include gender, ethnicity, and grade level. Noticeable differences in any of these categories should be examined closely.

Similarly, the range in the number of days pupils are suspended and the number of pupils who are suspended two or more times is vital, as is knowledge of the most frequent causes for suspensions.

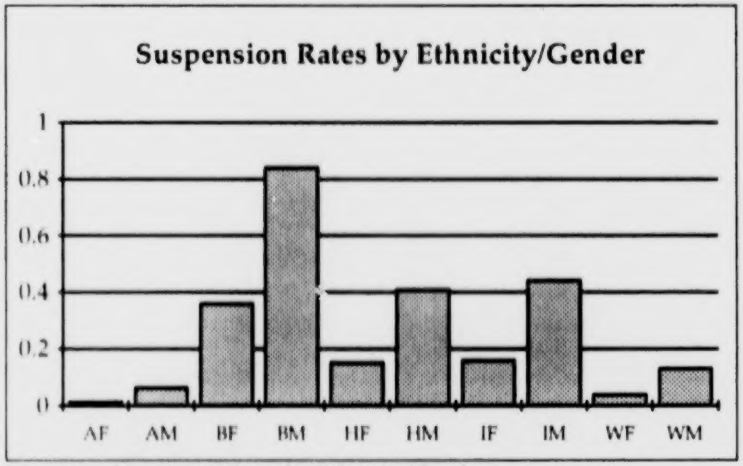

Figure 6: Suspension Rates by Ethnicity/Gender

Analysis of this information in its entirety could be useful to a school district interested in developing strategies to improve pupil disciplinary procedures or take steps to prevent disruptive behavior.

Other information that could be useful in an examination of school district disciplinary practices include the extent to which other "penalties" are imposed and the degree of the use of in-school suspensions compared to out-of-school suspensions. For example, are suspended pupils required to make up class time that they miss? Can a student make up and receive full credit for assignments missed because of a suspension? Are in-school suspensions preferred to out-of-school suspensions? How is in-school suspension time spent (i.e., are students allowed to work on class assignments)?

Although school districts were not required to report in-school suspensions, many schools did. Analysis of that data should be viewed as indicative of more complete information at best.

Pupils tend to be placed in out-of-school suspensions (105,065) much more frequently than in-school suspensions (21,147). Out-of-school suspensions averaged 1.97 days (206,531.5 total days), while in-school suspensions averaged 1.17 days (24,695 days).

In 26 school districts, 5 percent or more of the pupils enrolled received in-school suspensions at least once. Six of the 26 districts used in-school suspensions on 10 percent or more of their students. At the far end of the spectrum, Hartford UHS reported that 22.35 percent of its student body was suspended at least once.

With regard to out-of-school suspensions, 15 school districts reported suspending 10 percent or more of its pupils at least once during the year. The highest percentage reported was 22.5 percent at Lac du Flambeau #1.

Expulsion

DISTRICT School	Expulsion (All Grades)		
	No. of Pupils Expelled	No. of Days Expelled	Expulsion Rate
STATE AVERAGE OR TOTAL	**536**	**28,779.0**	**0.020**

What is it?

An expulsion is a sanction imposed for disciplinary purposes by formal school board action. It is defined in s.120.13(1)(c) and in s.119.25, Wis. Stats. This sanction is often a step of last resort, because it prohibits a student from attending school as required under s.118.15 and s.118.16, Wis. Stats.

In authorizing the School Performance Report, the Legislature mandated that all districts and schools report expulsion rates. This rate is calculated as the number of days of school missed by pupils expelled divided by possible days of attendance of all students in a particular school or district or for the entire state. The denominator includes all students in grades K through 12.

What does it say?

More than one-half of the state's 536 expulsions during the 1992-93 school year occurred in three districts: Racine (167), Milwaukee (96), and Waukesha (24). Twenty-eight other districts had more than two, but 322 districts had none.

Thirty-four schools reported expelling more than three pupils, with six Racine schools — three high and three middle schools — at the top of list. No expulsions were reported in 1,830 schools.

The average expulsion rate in Wisconsin for the 1992-93 school year was 0.02 percent. Central Union High School, in western Kenosha County, had the highest rate at 0.408 percent. Thirty-eight other districts exceed 0.05 percent.

Milwaukee Public Schools' alternative educational programs reported the highest expulsion rate. They serve a total of 854 students, mainly of high school age. Three students were expelled, producing an expulsion rate of 1.165 percent. Waukesha Central Junior High School, with 16 expulsions for a rate of 0.765 percent, is the highest non-speciality school. Thirty-six other schools had rates over 0.2 percent.

Expulsions are used most often in grades 8, 9, 10, and 11. Each grade level had a rate just under 0.050 percent for the 1992-93 school year. The rate for 7th grade is 0.035 percent, and for seniors it's 0.022 percent. Below grade 7, expulsions are almost non-existent, although one district reported expelling one elementary school pupil.

Males are four to five times more likely than girls to be expelled, and black and Hispanic males are about five times more likely than Asian or white males to be expelled.

What does it mean?

Analysis of these data is more meaningful when considered in light of gender, ethnicity, and grade-level data. It would also be helpful to know the answers to the following questions:

- How many students are provided with homebound instruction?
- How many young people receive alternative educational opportunities?
- Which students eventually re-enroll?
- Which pupils eventually drop out of school?
- How many students enroll in other schools?

There is other information that would prove helpful in analyzing the data on expulsions. For example, it is vitally important to know the most common reasons for expulsions. It could also be informative to know how many expulsions were appealed to the state superintendent of public instruction and the disposition of those appeals.

With respect to Wisconsin law, the statutes do not address the obligations of a parent or guardian in regard to compulsory attendance once a young person has been expelled.

The statutes also are silent on the length of time that pupil can remain expelled. Thus, the practices with respect to permitting or not permitting an expelled student to return to school vary widely. By law, however, an expelled student may apply for re-admission, and the school board may or may not agree to let him or her return.

Similarly, practices vary widely among school districts with respect to students continuing their education after expulsion. Some districts provide for homebound instruction, some pay tuition for enrollment in another school district, and still others do not undertake any obligation.

Retention

DISTRICT	Retention	
School	No of Retentions	Retention Rate
STATE AVERAGE OR TOTAL	17,632	2.121

What is it?

In Wisconsin, students who do not make sufficient progress in the prescribed course of study established by the local school board can be retained. Once retained, students must either repeat a grade or take additional time to complete their educational program.

In many high schools, students are not retained in grade until the end of their senior year when those students are short credits for graduation. Those students are returned as fifth-year seniors. For purposes of this document, high schools are asked to report as retained in grade those students who, at the end of a given year, are deficient one-seventh of the credits required for graduation.

As required by the Legislature, the School Performance Report publishes the retention rate for schools, districts, and the state average. That rate is calculated by dividing the number of retentions at the end of a school year by the third Friday enrollment.

Retention information was reported for students in grades K-12 and did not include young people in the following areas: B-3, exceptional educational needs classes (EEN) for ages 3 through 5; Chapter 1 Preschool; Head Start; and 4-year-old kindergarten.

What does it say?

Overall, 17,632 pupils met one of the definitions of retention, an average of 2.121 percent statewide for 1992-93.

Four school districts had more than 500 retentions: Milwaukee (6,751), Racine (1,015), Madison (753), and Green Bay (632). These four districts accounted for more than one-half the state total. Nineteen other districts exceeded 100 retentions, and 78 reported none.

Of the state's 2,019 reporting schools, 43 exceeded 100 retentions (led by nine Milwaukee high schools). No retentions were reported by 957 schools.

Union high school districts are disproportionately represented in the reporting of retention rates. Seven are among the top 10 retention rates, including Hartford, first, with 9.178 percent. Milwaukee, at number 5, had the highest rate among K-12 districts at 7.162 percent. A total of 32 districts exceeded 3 percent.

Forty-eight schools exceed 10 percent, topped by three alternative programs (Racine's Brown and Mack Centers and Milwaukee's Partnership Program) where rates in excess of 40 percent reflect the "last resort" nature of the schools.

Milwaukee North Division (34.706 percent) and LaCrosse Logan (23.529 percent) have the highest retention rates among "regular schools."

(Subsequent to finalizing the data tables, LaCrosse Logan High School indicated that a reporting error had been made. Retentions at Logan were changed to 88, which decreases the school's retention rate to 9.244 percent).

The use of retentions is much higher at the high school level. It may not mean repetition of a grade, but, instead, a shortage of credits toward graduation. This type of retention in high school typically runs 4 percent to 6 percent (Figure 7).

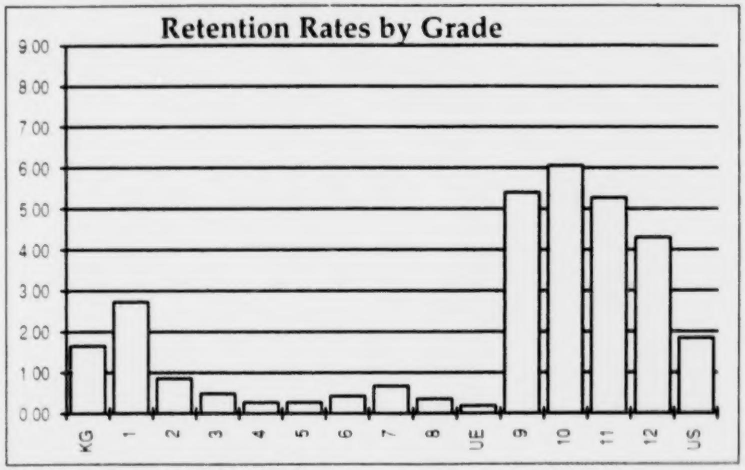

Figure 7: Retentions by Grade

In lower grades, where retention does mean repetition of a grade, the rate typically runs at a fraction of a percent. The exceptions to this pattern are at the very lowest grades, where 1.66 percent of kindergartners and 2.73 percent of 1st-graders are retained. Males have higher retention rates than females although the ratio doesn't exceed 2 to 1.

There is a pronounced difference in rates by race, ranging from a statewide average of 7.35 percent for blacks, through Hispanics, Indians, and Asians to 1.44 percent for whites.

What does it mean?

Although certain information is not included in the statewide report on retentions, some generalizations can be made from the data that are available. For example, the larger the school district and higher the retention rate, the higher the district's dropout rate. Additionally, retention and dropout rates tend to correlate directly (i.e., being retained in grade increases the likelihood that a student will fail to graduate from high school).

Retention in grade is a serious decision, because retained pupils fail to graduate from high school at a much higher rate than other groups.

After reviewing data in this section, school districts with retention rates near or above the state average of 2.121 percent may wish to examine their policies and look at the following:

- Gender prevalence, ethnic proportionality, or grade levels where most retentions occur.
- The number of repeat retentions.
- The number of those who are retained and ultimately drop out of school.
- The extent to which retained pupils are behind their peers in mathematics and language arts skills.

This information would give a more detailed analysis of retentions and could be helpful in developing strategies to increase student achievement and reduce retention rates.

Dropout

DISTRICT	Dropouts	
	(9th-12th)	
School	No of Dropouts	Dropout Rate
STATE AVERAGE OR TOTAL	**7,638**	**3.192**

What is it?

In Wisconsin, many efforts are made to keep young people in school and progressing toward graduation. Some, however, drop out, ending their educational experience prematurely.

A dropout is a student who should be in school but has stopped attending class. This student is 18 years old or younger, hasn't graduated or completed a district-approved educational program, and doesn't meet one of a list of prescribed exclusions (including transfer, excused absence, imprisonment, hospitalization, or death).

For the past two years, Wisconsin has used the federal definition of a dropout. Under the federal criteria, the dropout rate is the number of dropouts divided by the third Friday in September enrollment in grades 9 through 12.

What does it say?

Wisconsin's total number of dropouts for the 1992-93 school year was 7,638. That number, divided by the 1992 third Friday enrollment in grades 9-12, produced a dropout rate of 3.192 percent. If dropouts in grades 7 and 8 are added in, the state total increased to 8,053 students.

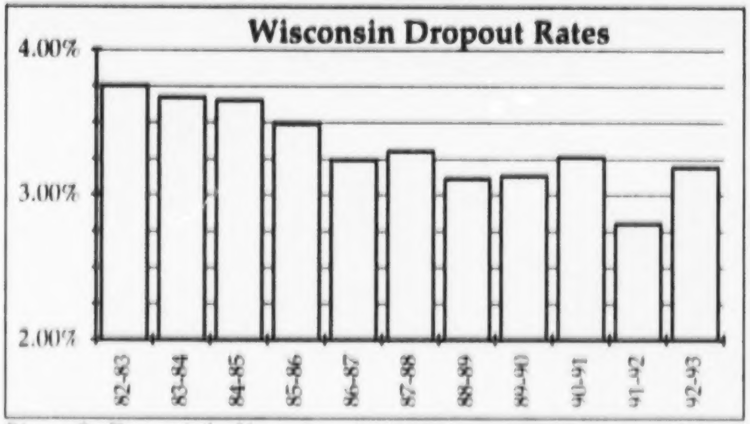

Figure 8: Dropouts by Year

Milwaukee's 3,801 dropouts represented nearly half of the state total. The next dozen districts fell between 50 and 400 students. Milwaukee's Partnership and Alternative Programs approached 600 dropouts each. Another 31 schools (including 14 in Milwaukee) had between 50 and 400 dropouts each. No dropouts were reported by 86 districts and 128 schools with 9-12 enrollment.

Milwaukee also had the highest dropout rate at 17.382 percent. Next were Ashland (9.217 percent), Racine (6.128 percent), Wisconsin Rapids (5.411 percent), Kenosha (5.352 percent), and Edgerton (5.049 percent). An additional 26 districts fell between 3 percent and 5 percent, and 30 individual schools exceeded 5 percent.

(Because of district reporting errors, Ashland, Baraboo, and Wisconsin Rapids subsequently reduced their number of dropouts, resulting in "new" dropout rates of 3.4 percent, 2.7, and 2.4 percent, respectively. These numbers were submitted in time to change the climate tables in this document.)

During the 1992-93 school year, dropout rates started at around 1.9 percent in 9th grade and increased steadily — 2.4 percent, 3 percent, 5.6 percent — through the remainder of high school. Males drop out slightly more often than females. Blacks, at 3.8 percent, are more than six times as likely to drop out as whites or Asians, both around 0.6 percent. Hispanics (2.5 percent) and Indians (2.0 percent) fell in between.

What does it mean?

Dropouts are a serious concern for educators, parents, and public officials in Wisconsin. If education is the key to the future, graduating is critical.

Therefore, it is essential to understand why students drop out of school before the problem can be solved. According to a federal survey, the most common reasons students give for dropping out between the 10th and 12 grades are:

- Didn't like or failing school.
- Job related.
- Pregnancy, parenthood, or marriage.

The state's compulsory attendance laws require students to be in school or another education program until they graduate or reach the age of 18. Those students who aren't in school are covered by the habitual truancy statute, which requires countywide planning for districts to work with 16- and 17-year-olds and their families to get those young people to regularly attend school.

For example, Milwaukee, which has the largest number and rate of dropouts, recently instituted the Truancy Abatement and Burglary Suppression Program (TABS) to combat truancy problems that often precede a student dropping out of school.

In Wisconsin, programs that help young people stay in school started early with the Department of Public Instruction's Preschool to Grade 5 (P-5) program. P-5 schools in Beloit, Kenosha, Milwaukee, and Racine receive additional funding from the state to lower class size and conduct special programs to improve student achievement.

Programs in upper grades include children-at-risk, Education for Employment, Post-Secondary Enrollment Options, Wisconsin Educational Opportunities, and Minority Precollege Scholarship programs.

Statewide, DPI is also supporting expanded early childhood programs in public schools and is working with other stakeholders on school-to-work programs, such as tech prep and apprenticeship, to improve students' preparation for the world of work.

What went wrong?

A mistake was made in calculating and reporting the dropout data for the statewide 1992-93 School Performance Report. In addition to the three non-reporting districts (Dodgeville, Menominee Indian, and Oostburg), information from eight districts (Fort Atkinson, Germantown, Hamilton, New Lisbon, Omro, Independence, Tigerton, and Kenosha) was not included in the report sent back to local school districts for their local publication.

The correct information is reported in the DPI Information Series Item #94-23, Dropouts by District, and this statewide School Performance Report. Neither document, however, includes the revised data submitted by Ashland, Baraboo, and Wisconsin Rapids.

Graduation

DISTRICT School	Graduation (12th)	
	No of Graduates	Graduation Rate
STATE AVERAGE OR TOTAL	**49,916**	**90.26**

What is it?

In Wisconsin, a graduate is a student who completes the prescribed course of study established by a local school district. Graduation diplomas also can be awarded by a school board for completion of a school-sponsored general education development (GED) program and attainment of the high school equivalency diploma (HSED).

The graduation rate compares the number of graduates at the end of the school year to the number of 12th-graders on the third Friday in September.

What does it say?

Statewide, 49,916 students graduated from high school during the 1992-93 school year, including the 1993 summer session. This total represented an overall graduation rate of 90.26 percent of the 55,305 students who started their senior year in the fall of 1992.

Four districts reported 10 or fewer graduates (Mercer and Washington at 10 and Phelps and the Wisconsin School for the Visually Handicapped at 6). The K-8 districts and Norris had no graduates. At the other end of the spectrum, four districts reported more than 1,000 graduates (Milwaukee at 3,036, Madison at 1,363, Green Bay at 1,109, and Racine at 1,087). The four districts with the largest graduating classes accounting for 12 percent of the state's 1993 public high school graduates.

An additional dozen districts reported more than 500 graduates: Appleton (856), Waukesha (851), Kenosha (819), Eau Claire (677), Stevens Point (630), Sheboygan (622), Janesville (609), Wausau (602), Oshkosh (555), LaCrosse (534), West Allis (526), and Elmbrook (521).

Among individual high schools, seven had more than 400 graduates: Stevens Point Area Senior High with 530, Appleton West (516), Waukesha South (463), Wisconsin Rapids Lincoln and Madison West (414), Kenosha Tremper (411), and Fond du Lac Goodrich (404).

Because students can transfer into a district after the enrollment count taken on the third Friday in September, it is possible to have more graduates at the end of the year than seniors at the beginning. This happened in the 24 districts where the graduation rate exceeded 100 percent. Another 51 districts had a graduation rate of exactly 100 percent.

(Fairview South High School in the Elmbrook School District shows a graduation rate of ">100%." This school exclusively serves severely disabled youth. The programs in this institution are ungraded, and students "graduate" when they complete their individual education plan (IEP), rather than when they complete the 12th grade.)

The lowest graduation rate was in Fond du Lac, at 70.88 percent, followed by Edgerton, Cudahy, Kenosha, Menasha, Rhinelander, and Weyauwega-Fremont, which were all below 80.0 percent.

Most districts had only one high school, so the same schools exceeded 100.0 percent. In addition, Madison East and Memorial joined the list, and both West Bend high schools were represented. Interestingly, so was Milwaukee Alternative Programs (126.77 percent), which also appeared at the top of the dropout rankings. Fifty-two schools were at exactly 100 percent.

Thirty schools fell below an 80 percent graduation rate, including 11 schools for children with special problems that reported no graduates.

What does it mean?

As stated, the graduation rate is calculated by dividing the number of graduates in the spring by the number of 12th graders enrolled the previous fall. The rate is not adjusted to reflect students who either leave or enroll in school during the year. Therefore, readers are cautioned not to over interpret the statistics.

For example, a low graduation rate does not mean a high dropout rate. For this same reason, it also is possible for a district to show a graduation rate in excess of 100 percent because of students entering the 12th grade after the third Friday in September. At the end of the 1992-93 school year, 25 districts showed a rate exceeding 100 percent.

Readers also are reminded that 47 districts in Wisconsin operate K-8 only and have no high school enrollment or graduates.

Postgraduation Follow-Up

DISTRICT School	Postgraduation Follow-up (12th)						
	Job Training %	Voc/Tech College %	4-Year Col/Uni %	Military %	Employment %	Seeking Employment %	Other %
STATE AVERAGE OR TOTAL	**2.3**	**22.8**	**48.2**	**3.6**	**9.0**	**4.9**	**9.2**

What is it?

Success of Wisconsin's K-12 educational system is linked to the lives young people live once they graduate. In an attempt to "measure" those lives, 12th graders were surveyed as to their plans following graduation.

Students answered surveys prior to the end of the school year indicating their plans after graduation. Choices included a job training program, vocational or technical college, four-year college or university, enlistment in the military, employment, seeking employment, or other.

The School Performance Report table shows the percentage of 12th graders enrolled in the fall of the 1992-93 school year who selected the postgraduation intention that best expressed their choice at the time the survey was distributed.

What does it say?

A college education was the goal of nearly half the state's 1993 graduates, as 24,077 of the 49,916 (48.2 percent) selected that as their intended choice of what to do after graduation from high school. Another 11,394 (22.8 percent) picked a two-year vocational or technical program, followed by 4,484 (9 percent) who expected to be employed, 2,435 (4.9 percent) who said they would look for work, 1,787 (3.6 percent) headed for military service, and 1,170 (2.3 percent) intended to enter a one-year technical college or job-training program. Just over 9 percent, or 4,569 of the expected graduates, didn't have any specific intentions at the time the survey was conducted.

Whitefish Bay had the most students who said they would be college-bound following high school graduation, 89.7 percent of the third Friday in September senior class enrollment. Whitefish Bay was followed by Kohler, Mequon-Thiensville (Homestead), Nicolet (Glendale), and Shorewood all exceeding 80 percent for college-bound students. Another 42 districts fell between 60 percent and 80 percent for the 1992-93 school year, and 10 districts had no students who intended to go to college. Fifty-eight high schools had between 60 percent and 90 percent of their graduates intending to head for college, and 13 had none.

In Berlin, Evansville, Glenwood City, Hamilton (Sussex), Kewaskum, Mineral Point, and Watertown, between 66 percent and 75 percent of seniors said they were headed for a two-year vocational or technical college program. Another 31 districts had at least 40 percent showing interest in this form of postsecondary education. Only three districts reported no graduates with these intentions. Superior's Northland High School had eight seniors (the entire enrollment) select the vocational-technical program alternative. Six high schools had no one make this choice.

In Almond-Bancroft, Barneveld, Goodman-Armstrong, New Lisbon, Oakfield, Shell Lake, and Wabeno between 30 percent and 50 percent of the high school seniors selected employment on the postgraduation intention survey. In another 39 districts, between 20 percent and 30 percent of the seniors selected employment for their postgraduation plan. Coincidentally, 39 districts reported no 12th-graders with these intentions. These data, analyzed by individual school, showed much the same trend, except that 44 schools reported no seniors selecting employment.

Between 25 percent and 38 percent of the senior class in Pardeeville, Pepin, River Falls, River Valley (Spring Green), and Weston (Cazenovia) said they would be looking for work after graduation. The same response came from between 15 percent and 25 percent of the graduates in another 33 districts. Conversely, 116 schools in 104 districts — more than a 25 percent of those reporting — indicated no seniors had selected this option on the postgraduation intention survey.

More than 16 percent of the seniors in the following districts preferred military service: Argyle, Colfax, Northwood (Minong), Phelps, Washington, and White Lake. Another 19 districts had more than 10 percent of their 12th-grade enrollment selecting this option, although 47 districts and 51 schools had none.

Cassville and Seneca, both just over 45 percent, led the list of districts in which seniors said they intended to attend a job-training program. Another 24 districts fell between 10 percent and 37.5 percent, but 197 districts and 211 schools had no selections in this category of the survey. Stevens Point's report of all 100 of SPASH Alternative High School's graduates going this route was probably a reporting error or misunderstanding.

Stevens Point also had the most entries in the "Other" category, because the 530 Stevens Point Area Senior High graduates produced a rate of 71.8 percent. This was probably a reporting error or misunderstanding. Additionally, the same explanation probably applied to Fond du Lac (66.6 percent). Northland Pines, at 39.2 percent, headed a list of 16 "believable" districts that fell between 20 percent and 40 percent.

It should be noted that the "unbelievable" reporting in this category may be attributed to software collection that would not allow districts to submit postgraduation intention data that did not account for all seniors. Many districts without the required postgraduation data probably made use of the "Other" category to complete the collection.

What does it mean?

Clearly, senior intentions may not be what individuals actually do following graduation. Readers should take this fact into account when analyzing these data. Intentions also change in the spring of the senior year. As a result, some schools that compiled local information earlier in the spring may find many students with changed intentions prior to graduation.

Based on the information provided by school districts, more than 73 percent of Wisconsin's 1993 high school graduates indicated that they planned to pursue some form of post-high school educational experience. This could include one-year technical programs, two-year or longer vocational or technical colleges, or four-year colleges or universities. According to information provided, only one in seven graduates planned to enter the work force directly.

It is understood that the information gathered from an actual follow-up survey of Wisconsin high school graduates would be more useful to educators, parents, students, and others. The Department of Public Instruction will study the possibility of using this type of report in future years.

School-Sponsored Community Activities

DISTRICT School	School-Sponsored Comm. Activities (9th-12th, US)			
	No. of Offerings	Required (Particip Rate %)	Voluntary (Particip Rate %)	Overall (Particip Rate %)
STATE AVERAGE OR TOTAL	**8,939**	**41.1**	**45.3**	**86.4**

What is it?

There is a growing trend in American schools to include community service in students' educational experiences. School-sponsored community activities are school-supervised events that emphasize service to and involvement with the community. The School Performance Report tracked these activities in two areas:

- Required: Activity is mandatory, or a grade or credit for graduation is given.
- Voluntary: Activity is not mandatory, and no grade or credit for graduation is given.

Participation rates were based on the number of reported participants divided by the total student enrollment in grades 9 through 12, including ungraded secondary pupils. The participation rate could be more 100 percent because the School Performance Report asked districts to report the number of students taking part in a range of activities within either the required or voluntary category, which could result in a multiple count is some cases.

What does it say?

Only 379 of the 429 districts included in this report and 494 of the schools in them operated grades 9-12 (including ungraded secondary) during the 1992-93 school year and thus were asked to report school-sponsored community activities.

There are two types. Of the 494 schools, 298 (representing 69 percent of the enrollment) offer required and voluntary activities. As with extracurricular, it is common for students to participate in more than one activity.

The state average participation rate of 86.4 percent is somewhat misleading, because it's determined by dividing the 207,825 participants by the enrollment in grades 9-12 in all 429 districts. Fifty-six of the eligible districts (and 118 of the eligible schools, with 14 percent of the enrollment), however, did not offer community-service opportunities. If the total number of participants was divided by 217,807, which was the enrollment of schools where opportunities were available, the average participation rate rose to 95.4 percent. The average 9-12 student enrollment of districts with offerings was 674, and for districts without offerings it was 407.

Ninety-eight districts and 169 schools had no community-activity offerings, and 27 schools (4 percent of the enrollment) had required offerings only. Milwaukee (142), Green Bay (60), Appleton (44), Sheboygan (40), and Shawano-Gresham (40) had the most required activities available, but another 46 districts have more than 20 such activities. The state total was 4,962. These activities included nearly 100,000 separate situations statewide, led by Milwaukee (2,573), Eau Claire (2,459), Racine (2,415), and Appleton (2,372), plus another 11 districts with more 1,000.

These figures weren't shown in the School Climate table. Interdistrict comparability is shown through participation rates. By that measure, Alma, Bowler, Brillion, Elroy-Kendall-Wilton, Goodman-Armstrong, Laona, and Winter were the leaders, all with more than 200 percent of their students involved in required school-sponsored community activities. The state average was 41.1 percent.

Among individual schools, Mauston High School had 44 offerings, and Royal High School in Elroy had 26. In terms of student involvement, Racine Horlick led the state at 2,154. Another seven high schools (Arrowhead, Ashwaubenon, Beloit Memorial, Eau Claire Memorial and North, Marshfield, and Sun Prairie) exceeded 1,000 participants, and another 37 fell between 500 and 1,000. Because most districts operated only one high school, participation rates by school closely resembled those by district, except for the addition of Shawano-Gresham's Gresham High in the number 2 spot at 268.9 percent.

Seventy-nine districts and 143 schools had no voluntary community-service opportunities, and 51 schools (14 percent of enrollment) had voluntary activities only. Milwaukee had 186 voluntary opportunities for its students. Green Bay was next at 84, followed by Eau Claire and Sheboygan, both at 40. Another 30 districts have more than 20 offerings. These same four districts, plus Beloit, Greenfield, Marshfield, and Sheboygan, each sent more than 2,000 students into their communities during 1992-93. State totals for the 1992-93 school year were 3,977 voluntary offerings and 109,021 participants.

The highest participation rate in voluntary community service activities was in Solon Springs (Saint Croix High School) at 702.4 percent. The next highest rate was 360.1 percent in Abbotsford. Another 21 districts fell between 150 percent and 300 percent. The state average is 45.3 percent.

Among individual schools, Abbotsford and Black River Falls high schools each had 27 offerings, and another 23 had from 21 to 25. Five high schools — Beloit Memorial, Green Bay's Preble and East, Greenfield, and Stevens Point — had more than 2,000 participants, while another 16 exceeded 1,000. As above, participation rates in schools are virtually identical to those in districts.

Wisconsin's public schools offered 8,939 community-service programs. The most activities generated by these programs are in Green Bay (more than 10,000 participants reported), Milwaukee (6,844), Eau Claire (5,042), and Racine (4,406). The highest participation rates were in Abbotsford, Alma, Brillion, Drummond, and Solon Springs. These high schools exceeded 300 percent, and another 36 districts averaged between two and three such activities per student.

What does it mean?

Community activities should be considered distinctly different from extra-/co-curricular activities because of their emphasis on service and community involvement. In the best scenario, the service act is directly connected to an academic experience, personal growth, and civic responsibility with an opportunity for reflection.

Although the School Performance Report asked only for high school participation, the Department of Public Instruction recognizes that service-learning takes place throughout the K-12 school experience.

At the present time, this report makes no distinction between global collection of school-sponsored community activities and much more narrowly-defined service-learning projects. With the advent of the National and Community Service Act, however, Wisconsin has taken a leadership role in fully developing service-learning opportunities. For example, for the 1993-94 school year, 12 cooperative educational service agencies (CESAs) and 68 school districts received service-learning grants to initiate pilot community service projects.

Extra-/Co-curricular Participation

DISTRICT School	Extra Co-Curricular Activities (6th-12th, UE, US)				
	No of Offerings	Academic (Particp Rate %)	Athletic (Particp Rate %)	Music (Particp Rate %)	Overall (Particp Rate %)
STATE AVERAGE OR TOTAL	**56,847**	**60.5**	**86.0**	**44.7**	**191.3**

What is it?

Extra-/co-curricular activities offer students throughout Wisconsin numerous and varied opportunities outside of the regular curriculum to broaden, develop, and enhance their school experience. These activities are characterized as academic, athletic, and music.

Participation rates were based on the number of reported participants divided by the total student enrollment in grades 6 through 12, including ungraded elementary and ungraded secondary pupils. The participation rate could be more than 100 percent because districts were asked to enter the number of students taking part in a range of activities within one of the three major extra-/co-curricular areas.

The range of activities was taken from the Wisconsin Elementary and Secondary School Accounting System manual. For example, a student who competed in basketball, baseball, and football would be entered in the athletic category three times.

What does it say?

Wisconsin students were engaged in a variety of extra-/co-curricular activities during the 1992-93 school year. About 60 percent of the students took part in academic activities in those schools that had offerings, 86 percent of the students were involved in athletics, and 44.7 percent participated in extra-/co-curricular music.

Statewide, 423 districts reported offering extra-/co-curricular activities. There were 56,847 separate offerings, or an average of more than 128 per district. All 429 districts (including the schools for the visually handicapped and the deaf) — and the 1,405 schools operating 6th, 7th, 8th, 9th, 10th, 11th, or 12th grades — were eligible to report.

Only six districts offered no extracurricular academic activities, while 17 offered between 100 and 300. Green Bay (850) and Milwaukee (900) had a substantial share of the statewide total of 20,151 such academic programs. The offerings weren't evenly distributed within the districts, though, as 409 schools reported no such opportunities for their students.

Elementary districts — Boulder Junction J1, Fox Point J2, Norway J7, Richfield J11, Walworth J1, Washington-Caldwell, and Wilmot Grade — were best represented, with academic participation rates of 250 to 300 percent. They were joined by the K-12 districts of Abbotsford and Edgar. Another 30 districts fell between 150 percent and 250 percent. The state average was 60.5 percent.

Among individual schools, only six in Green Bay — four high and two middle schools — exceeded 100 academic offerings. Elkhart Lake-Glenbeulah Middle School, Green Bay Edison Middle School, New London's Sugar Bush Elementary, and Sevastopol Elementary all topped 400 percent participation rates.

Just one district offered no extracurricular athletics. Milwaukee, at the other end of the spectrum, had 1,067 athletic opportunities for its students. Green Bay was next at 733, and another 26 districts had between 100 and 350 such offerings. Four hundred and thirty-three schools reported no such activities available.

Again, elementary districts showed the highest participation rates in athletic activities, holding down the top 10 positions — from 481.1 percent in Geneva J4 to 287 percent. The first K-12 district on the list, Green Bay, showed up at number 11 with a 285.1 percent participation rate in athletic activities.

Among individual schools, eight from Green Bay joined Arrowhead and Sheboygan South high schools in the top 10 for athletic offerings. Green Bay's Edison Middle School had the highest individual rate at nearly 700 percent participation. Twenty-five other schools had rates between 250 and 500 percent.

Of the 431,926 students in the state eligible for some sort of athletic activity, 371,635 took part, an overall participation rate of 86 percent. The average represented a mixture of some students who were in multiple sports and some who were in none at all.

Twenty districts offered no music activities, and only six offered more than 100 such opportunities. No extracurricular music was offered in 476 schools. In many school districts, however, music was an integral part of the regular curricular program.

Fontana J8, Fox Point J2, Raymond #14, Sharon J11, Washington-Carldwell, and Yorkville J2, all elementary districts, exceeded 200 percent participation rates for extracurricular music. Another 20 districts fell between 150 and 200 percent. The state average is 44.7 percent.

Appleton's Badger Elementary (414.3 percent) and Waukesha's White Rock Elementary (264.7 percent) had the highest participation rates for extracurricular music among individual schools.

Every Wisconsin school district offered some form of extracurricular activity during the 1992-93 school year. The same elementary districts show up under the combined total participation rate that dominated the individual offerings, starting with Washington-Caldwell at 833.8 percent. Abbotsford (605.9 percent) at number 9 and Clayton (572.2 percent) at number 12 were the first K-12 districts on the list. In all, 49 districts exceeded 400 percent, and 20 of them are elementary districts.

The highest participation rate for an individual school was 1,243 percent in Green Bay's Edison Middle School — an average of more than 12 activities per student. Another 26 schools fell between 600 percent and 1,000 percent.

What does it mean?

Across the state, the extra-/co-curricular activity participation rate average was 191.3 percent. Although this rate may be inflated because students who participated in more than one activity and in more than one category were counted more than once, it would seem to indicate that the average state student (6th through 12th grade) participates in two activities. Conceivably, an overall participation rate of more than 500 percent is possible if every student participated in five or more activities in any of the three categories.

The entire area of extra-/co-curricular activities contains numbers that should be viewed as indicators of general trends rather than as precise statistics. As already stated, districts were asked to report all offerings and all participants. A further example could find a student on four athletic teams, three academic squads, and one music group being counted eight times.

Even if every district reported correctly, this approach leads to inconsistencies. On the other hand, if a student did not participate in any activity, there is no way of showing that non-involvement.

What went wrong?

Because of a processing error, data from 50 school districts was not included in the state totals and state rates that were returned to the districts for use in their local school performance reports. All of the data, however, is included in the statewide report (except for the three non-reporting schools).

Test Results

The 1992-93 School Performance Report contains school district achievement data from three assessments. Additionally, it provides information about exams being developed for 8th and 10th graders as part of the Wisconsin Student Assessment System, a performance- and portfolio-based system for use in its entirety beginning with the 1996-97 school year.

Legislators mandated that the report show indicators of academic achievement, including those mentioned in s.121.02(1)(r) and other statewide assessments required by the state superintendent of public instruction.

In s.121.02(1)(r), the Legislature established a standardized reading test for all third graders, including those in charter schools. The second reference to statewide assessments—s.118.30(1)(a)—calls for the "measure of pupil attainment of knowledge in the 8th and 10th grades."

The 8th- and 10th-grade exams were developed by the American College Testing Corporation of Iowa City, Iowa, and were given on a voluntary basis during the 1992-93 school year. These examinations will be replaced during the 1993-94 school year by tests being developed by Psychological Testing Corporation of San Antonio, Texas.

In addition, this performance report contains results from two other assessments, the Enhanced American College Test (ACT) and the Advanced Placement (AP) Test.

The ACT, also a product of the American College Testing Corporation, measures knowledge acquired from kindergarten through 12th grade in English, mathematics, reading, and science reasoning. Scores are used as college and university entrance criteria by the University of Wisconsin (UW) System and many other postsecondary institutions.

AP exams are products of The College Board of Princeton, New Jersey. These tests allow a student to demonstrate academic proficiency in a wide range of subjects. Successful completion results in college credit which is accepted by the UW System and many other colleges and universities across the country.

Third Grade Reading Test

DISTRICT	Third Grade Reading Test					
School	Enrollment at Test Time*	Students Tested	% Students Tested	% Below Performance Standard	% Incon-clusive	% Above Performance Standard
STATE AVERAGE OR TOTAL	**62,887**	**57,517**	**91.5**	**6.3**	**8.2**	**85.5**

What is it?

The Third Grade Reading Test (TGRT) measures students' performance against a statewide performance standard, thereby providing districts with a mechanism to evaluate reading programs.

In 1989, a performance standard—on which the 1993 standard is based—was established by the state superintendent, taking into consideration the recommendations of a panel of third-grade teachers and reading specialists.

Legislators, meeting in September 1991, required school districts to extend remedial reading services to students in the fourth grade. The legislation also mandates the use of TGRT scores to help determine which students are in need of remediation.

Three reading passages—two narratives of approximately 1,000 words each and one expository passage of about 600 words—are included in the assessment. Students completed 90 questions that measured their comprehension, reading strategies, prior knowledge, and attitudes about reading. The performance standard was based only on the 40 comprehension questions. A score of 40 is the highest total possible.

The 1992-93 test was administered to all public school third graders except those absent during the testing period (March 22 to April 2) or excused by local school officials due to exceptional educational needs (EEN) or limited English proficiency (LEP). MetriTech of Champaign, Illinois, developed the test with direction from the Department of Public Instruction and the TGRT Advisory

BEST COPY AVAILABLE

Committee. Questar Data Systems of Eagan, Minnesota, scored the test.

Results are expressed as percentages of students who scored in the three performance standard categories: Above the Performance Standard (scores from 28 through 40 questions correct); Inconclusive (22 through 27); and Below the Performance Standard (0 through 21).

What does it say?

Districts with students enrolled in third grade — 416 of the state's 427 districts — administered the assessment. Every student scored above the performance standard in 38 districts, and no students scored below the performance standard in 97 districts.

During the 1993 TGRT testing period, 62,887 students were enrolled in the third grade in Wisconsin's public schools. Of that number, 57,517 (91.5 percent) took the assessment. Approximately 6 percent of the students enrolled at test time were excluded because of EEN or LEP, and about 1 percent of the students were absent during the time the test was administered. In Wisconsin, 6,017 third-grade pupils were identified as in need of special services (EEN), and 38.5 percent of that number took the test.

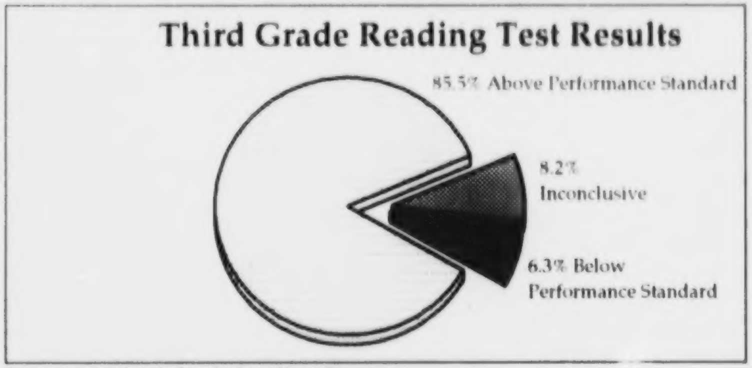

Figure 9: Third Grade Reading Test

The highest possible score of 40 was achieved by 7,493 third graders (about 13 percent). In terms of the 1991 legislation, however, 8,362 students were referred to district staff for evaluation and possible reading remediation. Additionally, 109 districts had at least one school in which fewer than 80 percent of tested third graders scored above the performance standard.

What does it mean?

While the TGRT provides a good picture of a district's reading program in the primary grades, it doesn't necessarily offer an accurate reflection of overall school building or district performance.

In general, test results show that students with higher prior knowledge and reading strategy scores tend to score higher on the comprehension questions.

Test results for the 1992-93 school year remained stable compared to prior years. The average score was 34 questions correct. Additionally, 85.5 percent of those tested scored above the performance standard, 8.2 percent inconclusive, and 6.3 percent below the performance standard (Figure 9).

Although scores over a five-year period are relatively stable, fluctuations from year to year are to be expected. This is especially true in districts where a smaller number of students is tested.

A breakdown of the TGRT data shows interesting results by gender, ethnicity, size of district, and poverty level. Males scored an average of 84.1 percent correct answers, and females had an average score of 85.9 percent. In terms of ethnicity, white students had an average score of 86.8 percent correct, Asian or Pacific Islanders 83.6 percent, Hispanics 79.8 percent, American or Alaskan natives 79.0 percent, and blacks 70.3 percent.

There was little difference in scores by size of school district, except for the state's 14 largest districts. Schools with 10,000 or more students had an average of 79 percent of their students scoring above the performance standard. In the other district size categories (4,000 to 9,999, 1,000 to 3,999, and 999 or less), between 88 and 89 percent of the students, on average, scored above the standard. The state average was 85.5 percent.

TGRT scores were lower in districts where more children came from families receiving Aid to Families with Dependent Children (AFDC). The average score in districts with 10 percent or more of the children from families on AFDC was 6.8 percentage points lower than in districts where only 5 percent of the students belonged to AFDC families.

PLAN and EXPLORE

What is it?

The School Performance Report, in part, contains "indicators of academic achievement, including the performance of pupils on .... statewide assessment examinations" (s.115.38(1)(a), Wis. Stats.) Two statewide examinations were established by the Legislature (s.118.30, Wis. Stats.) in the Wisconsin Student Assessment System (WSAS). This legislation requires the state superintendent of public instruction to adopt or approve examinations, for statewide use in the 8th and 10th grades, which measure pupil attainment of knowledge and skills. This requirement replaces Wisconsin's Competency-Based Testing (CBT) program and Standard (s), the achievement testing requirement of the 20 Educational Standards.

Information furnished by the WSAS will serve three functions: planning and guidance, certification of achievement, and accountability. The system, when fully implemented in the 1996-97 school year, will contain a trio of assessments: knowledge and concepts examinations, performance assessments, and portfolio assessments.

For the 1992-93 school year, district participation in the 8th- and 10th-grade examinations was optional. Beginning in the 1993-94 term, however, those examinations will be mandatory.

Because both tests were voluntary during the 1992-93 school year no school or district results are documented in this year's School Performance Report.

To meet the WSAS knowledge and concepts testing requirements, the state superintendent selected 8th- and 10th-grade examinations developed by American College Testing Corporation (ACT) of Iowa City, Iowa. The EXPLORE program for 8th graders and the PLAN set for 10th graders were used in 1992-93 to assess students' knowledge in English, mathematics, reading, and science reasoning. It was also designed to provide educational and career planning. In addition, the 8th-grade EXPLORE program included two writing assignments.

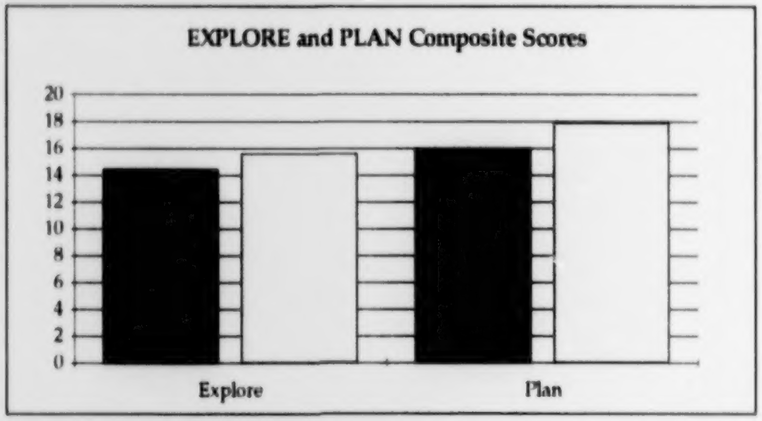

Figure 10: EXPLORE and PLAN Composite Scores

What does it say?

In 1992-93, more than 88 percent of school districts in Wisconsin participated in the voluntary phase of the WSAS. In November 1992, approximately 46,000 students at each grade level participated in the assessment. Scores on these tests were reported using scale and quintile scores.

The 8th-grade EXPLORE test had a scale score of 1 through 25 points, and the 10th-grade PLAN test had a scale score of 1 through 32 points on each portion of the exam (English, mathematics, reading, and science reasoning). The average composite scale score in Wisconsin on the EXPLORE test was 15.6 points, compared to 14.4 points nationally. On the PLAN test, the average composite scale score was 17.9, compared to 15.9 nationally (Figure 10).

Scores on the writing portion of the EXPLORE test for 8th-grade students were calculated on a modified holistic scale of 1 through 6 points. In Wisconsin, the average score was 3.47, slightly above the national average of 3.45. About 80 percent of students tested in this state earned a score of 3 or better.

What does it mean?

Districts should use the results of the career interest and study skills assessment to help students identify areas of interest and to set future goals.

In addition, EXPLORE and PLAN test scores were arranged from high to low and divided into five groups or quintiles. The fifth quintile included the top 20 percent of the scores in the nation. Wisconsin students compared favorably to the national norms. Whereas 20 percent of those tested nationally scored in the top quintile, 32 percent of Wisconsin's 8th graders and 39 percent of the state's 10th graders scored in the top quintile.

Districts can use results of the EXPLORE and PLAN tests to compare their students' achievement with students across the state and nation. Caution should be used, however, when interpreting test results using a single instrument. A limited set of test scores is an unreliable measure of the quality of education offered in a school or district. Those wishing to assess student achievement and the quality of education in any school or district should include other information.

As mentioned, the first mandatory phase of the WSAS will take place in the 1993-94 school year. The state superintendent selected Psychological Corporation of San Antonio, Texas, to provide examinations for 8th- and 10th-grade testing. The 1993-94 WSAS 8th- and 10th-Grade Knowledge and Concepts Examinations is designed using test items from the Stanford Achievement Test, Eighth Edition; Stanford Writing Assessment Program; and GOALS: A Performance-Based Measure of Achievement. Also, The Psychological Corporation's *Career Interest Inventory* is included at both grades.

The tests include:

- multiple-choice questions in reading, mathematics, language, science, and social science;
- free-response, short-answer questions in reading, mathematics, science, and social science;
- two writing samples; and
- a survey of students' career interests and educational plans.

Total time needed to complete the cognitive portion of the examinations will be approximately four hours. In addition, the *Career Interest Inventory* will take about 45 minutes to complete.

Enhanced American College Test

DISTRICT	ACT—Class of 1993						
	Students Tested*	% Students Tested*	Average Student Score				
School			English	Math	Reading	Science	Composite
STATE AVERAGE OR TOTAL	**30,925**	**56.27**	**21**	**21.2**	**22.2**	**22**	**21.7**

What is it?

The Enhanced American College Test (ACT) is the predominant college admission test in 28 states. It is an entrance requirement for the University of Wisconsin System and many other state colleges and universities. The American College Testing Company of Iowa City, Iowa, administers and scores the test.

Although juniors and seniors take the ACT, the information in this report includes the scores and numbers from members of the graduating class of 1993 who took the test as juniors or seniors. Students may take the test more than once, but only the most recent score is included. Only tests that have been completed are counted.

ACT consists of four parts: English, mathematics, reading, and science reasoning. Each part contains multiple-choice questions designed to measure knowledge, understanding, and skills acquired during the K-12 educational experience. In addition to reporting scores in the four subject areas, a composite score is also included. Each portion of the assessment has a maximum score of 36.

The average student score is the sum of the scores for students in a school or district in the four tested areas divided by the number of members of the graduating class who took the ACT either as juniors or seniors. The composite score is the weighted average of the four scores (English, mathematics, reading, and science reasoning) of a school or district.

What does it say?

ACT was taken by 66.3 percent (35,072) of Wisconsin's 1993 graduates. Nationally, 875,603 students—about 50 percent of 12th graders—took part. As has been the case since 1987, the number of Wisconsin students taking the test has increased every year. Last year, 62.6 percent (33,691) of the class of 1992 was tested.

The composite score for Wisconsin students was 21.8, a slight increase over the 1992 composite score of 21.6. For 1993, the national composite score was 20.7.

A breakdown of the 1993 results shows the following average scores for Wisconsin students (with national average scores in parentheses): English, 21.1 (20.3); mathematics, 21.2 (20.1); reading, 22.2 (21.2); and science reasoning, 22.0 (20.8).

What does it mean?

Enrollment in core curriculum classes had a significant impact on ACT scores. The core curriculum consists of four years or more of English and three years or more of mathematics, science, and social studies.

In Wisconsin for 1993, those students enrolled in the core curriculum registered an average composite ACT score of 22.9, compared to 20.5 for those students who took the assessment but were not enrolled in a core curriculum. While the number of state students in core curriculum has increased gradually (from 46.1 percent in 1989 to 52.5 percent in 1993), Wisconsin still has fewer test-takers enrolled in core courses than in the national sample, 54.8 percent. This may be due to the ACT being used as an entrance requirement of the University of Wisconsin System. State students take it whether they are college-bound as seniors in high school or only think they may attend college at a later date. Additionally, some students take the ACT to assess their performance relative to college-bound students.

In Wisconsin, white students — who make up 92 percent of ACT test-takers — scored higher than other ethnic groups. A high proportion of white and Asian test-takers are enrolled in the core curriculum. Despite an increase in core curriculum enrollment of black students (from 37.5 percent in 1989 to 42.5 percent in 1993), their average composite score last year was 0.3 percent lower than for 1992. This is explained by the fact that the number of blacks taking the test increased, but the largest percentage increase was among those students not enrolled in a core curriculum.

Mexican-American students showed the lowest enrollment in core curriculum (37.0 percent).

As the number of Wisconsin students taking the ACT has increased, there has not been a decrease in average composite scores. Such a result would be expected as the pool of test takers grows. In the state and nation, scores have remained steady and actually increased from 1992 to 1993.

In 1987, 42.6 percent of Wisconsin seniors had taken the ACT, with an average composite score of 22.1. The percentage of seniors taking the test has increased every year. Scores dropped to 21.9 in 1988 and 1989, 21.8 in 1990, 21.7 in 1991, and 21.6 in 1992. As reported, the average composite score for 1993 climbed back to 21.8.

Gender is also related to ACT scores. In Wisconsin in 1993, 16,236 males took the exam, recording an average composite score of 22.1. At the same time, 18,836 female students took the test and scored 21.4. Similar differential results are seen in national statistics.

In respect to gender, it should be noted that students who have taken calculus and physics score higher on the ACT than those who haven't taken those courses. Males enroll in these courses in higher numbers than do females.

A by-subject breakdown of the ACT results shows males scoring higher than females in three areas in addition to the composite: mathematics, 22.0 and 20.4; reading, 22.5 and 22.0; and science reasoning, 22.8 and 21.3. Females had a higher average score than males only in English, 21.4 and 20.7.

ACT scores, as might be expected, are highly related to grade-point average (GPA). Students with a 3.5 to 4.0 GPA scored 2 to 3 points higher than students with GPAs of 3.0 to 3.49.

Family income is also related to the ACT. Scores increased directly as family income increased from low ($6,000 to $12,000 annually) to high (over $60,000).

In addition to testing knowledge, ACT also collects information about students' plans for college and careers. Health sciences is the area selected by the largest number of students, with females selecting this area in much higher numbers than males (22 percent of females, but only 9 percent of males picked it as their first choice). Business and management is the second most highly selected area for students, with engineering and the social sciences third. Gender differences were seen in these areas, with more males than females selecting engineering and more females than males selecting the social sciences.

What went wrong?

School districts were supplied with erroneous ACT data to complete their local School Performance Reports. Although the number of students tested reflects those members of the graduating class that took the test as juniors and seniors, it was defined during the collection process as juniors and seniors who took the test during 1993.

Because of that definition, the denominator in the calculation to determine the percentage of students tested was given to the districts as juniors and seniors enrolled on the third Friday in September, not the number of seniors enrolled.

The data printed in this statewide report are accurate.

Advanced Placement Testing

DISTRICT School	Advanced Placement Testing No of Students Taking Exams*	 No of Exams Taken	 No of Exams Passed	 % Passing Exams
STATE AVERAGE OR TOTAL	4,953	6,616	4,212	63.66

What is it?

The College Board's Advanced Placement (AP) Test program allows high school students to study at the college level and demonstrate their college-level accomplishments through a testing program. The College Board is located in Princeton, New Jersey.

The AP program is different from other advanced programs because it is geared toward requiring students to write examinations for college credit. All of the University of Wisconsin System institutions and many other colleges and universities around the country award credits through AP.

In 1993, the College Board offered 29 AP examinations in 16 fields. Each examination is approximately three hours long. Students who earn a 3, 4, or 5 on the exam are considered to have earned a passing grade, according to the College Board.

Student participation in AP examinations is left entirely to the individual school. The College Board does not require a formal AP class in the school for a student to take an examination. Schools may choose to offer formal preparation in a variety of ways, including advanced coursework, a formal AP course, tutorial opportunities, satellite or other distance learning opportunities, or joint ventures with other schools.

What does it say?

School districts in Wisconsin offered a total of 543 AP classes. Therefore, more than one-third of the school districts in the state participated in AP programs during the 1992-93 school year.

During the 1992-93 term, 4,953 students in 215 of Wisconsin's 445 public high schools took a total of 6,616 AP examinations. Many students took exams in several subject areas, and students passed (scores of 3, 4, or 5, as prescribed by the College Board) 63.66 percent of the exams taken.

What does it mean?

Because AP tests are optional, the 4,953 students taking the test are a self-selected sample. The only requirement for school districts is that they pay the reduced cost of $45 per exam for low-income students.

Over the past school year, there has been a dramatic increase (more than 1,000 students and 1,000 tests) in statewide participation in the AP examination program. The growth has been over 1,000 students and 1,000 tests. This places Wisconsin as one of the top-growing states in the nation in terms of AP participation.

It is easy to understand why larger schools offer more AP courses and often have more students taking AP exams. There are, however, some interesting and innovative methods being employed by smaller schools in order to offer students the AP opportunity. For example, some schools are now connected via fiber optic networks. This allows a teacher at one school site to teach an AP course in which students from several different schools participate. In other instances, the teacher for the course might be at a university or technical college site.

These methods provide students opportunities to participate in AP when it might otherwise not be feasible or economical for their local school to offer the course, for example when only a few students are interested or no teacher is available.

Advanced Course Work

DISTRICT	3rd Friday Enrollment (9th-12th)	Advanced Course Work (9th - 12th Grade)															
		Number of Advanced Courses Offered			Mathematics (% Enrollment)			Science (% Enrollment)			Foreign Language (% Enrollment)			Other (% Enrollment)		Combined Rate %
		AP	CAPP	DPI	AP	CAPP	DPI	AP	CAPP	DPI	AP	CAPP	DPI	AP	CAPP	
STATE AVERAGE OR TOTAL	240,184	543	226	4,940	0.91	0.24	6.32	1.00	0.10	8.11	0.25	0.10	50.24	2.81	1.30	71.40

What is it?

The names of advanced courses and the number of students enrolled in advanced courses were taken from the PI-1215 Curriculum Report which is filed by each school district in the fall of the year (Figures 11, 12, and 13).

Participation rates associated with each subject were determined by dividing the advanced course enrollments by the third Friday in September enrollment as reported on the PI-1290 Enrollment Report. Since information on the Curriculum Report is available only at the district level, no school-level data are provided.

There are three types of advanced coursework recognized by the Department of Public Instruction: Advanced Placement (AP) courses offered through The College Board of Princeton, New Jersey; those offered through the College Advanced Placement Program (CAPP) in conjunction with a local college or university; and those courses considered by the DPI to be advanced courses. Courses in this final category were selected by the committee that initially developed the School Performance Report.

Additionally, for purposes of the School Performance Report, all foreign language courses and enrollment in Wisconsin are shown on the Advanced Coursework table.

Advanced mathematics includes (listed by subject code, subject):

124-130	Technical Mathematics
124-330	Calculus and Analytic Geometry
124-700	Statistics/Probability
124-800	Trigonometry
200-020	AP Mathematics
205-020	CAPP Mathematics

Figure 11: Advanced Mathematics Courses

Advanced science includes (listed by subject code, subject):

126-202	Advanced Biology (second year)
126-312	Advanced Chemistry (second year)
126-322	Advanced Physics (second year)
126-402	Advanced Earth Science (second year)
126-410	Astronomy
126-450	Aviation
126-490	Biotechnology
200-010	AP Biology
200-011	AP Chemistry
200-012	AP Physics
200-021	AP Computer Science
205-010	CAPP Biology
205-011	CAPP Chemistry
205-012	CAPP Physics
205-021	CAPP Computer Science

Figure 12: Advanced Science Courses

Foreign language courses (listed by subject code, subject):

123-200	American Sign Language
123-205/305/405/505	Latin I, II, III, IV, and beyond
123-208/308/408/508	French I, II, III, IV, and beyond
123-209/309/409/509	German I, II, III, IV, and beyond
123-214/314/414/514	Japanese I, II, III, IV, and beyond
123-218/318/418/518	Russian I, II, III, IV, and beyond
123-219/319/419/519	Spanish I, II, III, IV, and beyond
123-910	Native American
123-999	Other Foreign Languages
200-001	AP French
200-002	AP German
200-004	AP Spanish
205-001	CAPP Foreign Language

Figure 13: Foreign Language Courses

What does it say?

Only 380 of the 427 districts (along with the Wisconsin School for the Deaf and the Wisconsin School for the Visually Handicapped) operated grades 9-12 and are reflected in this report. Of the 380 districts, 40 offered both AP and CAPP courses, 152 offered one or the other, and 188 offered neither. Because of this relative lack of participation, state averages for AP and CAPP, though they're shown in the table, aren't statistically meaningful and won't be mentioned in this narrative.

Averages will be used, however, as a standard of comparison for DPI-identified advanced courses, because they were available during the 1992-93 school year in almost every district.

Of the 543 AP courses offered, 30 of them were in Wausau. Five other districts offered 10 to 16 courses, and another 30 had five to nine courses. No AP courses were offered in 225 districts.

CAPP was less popular, with only 226 offerings. Oak Creek-Franklin had 30 of them. Three districts had 10 to 15 courses, and nine more had five to nine. No CAPP courses were offered in 305 districts.

There were 4,940 offerings statewide identified by the DPI as "advanced." Madison (209), Sheboygan (168), and Appleton (155) were most active in this area. Another 47 districts had between 21 and 100 courses. Only 18 had none.

Rice Lake had 9.48 percent enrollment in AP mathematics courses. Mequon-Thiensville was at 5.99 percent. Another 30 districts exceeded 2.5 percent, but 295 districts had no AP enrollment.

Oak Creek-Franklin's 28.6 percent participation rate for CAPP mathematics was one of only six districts that exceeded 2.5 percent. No CAPP courses were offered in 359 districts.

The state average for math courses identified by the DPI as "advanced" was 6.32 percent. Southern Door's 39.88 percent was highest. Hilbert and Blair-Taylor also exceeded 30 percent. Another 19 districts fell between 20 percent and 30 percent, and 106 districts had no participation.

Lake Geneva-Genoa City and Mequon-Thiensville both exceeded 10 percent of high-school students enrolled in AP science courses. Another 36 districts exceeded 2.5 percent, and 303 districts had no participation.

Sheboygan Falls and Rosendale-Brandon each exceeded a 7 percent participation rate for CAPP science. Five other districts exceeded 2.5 percent, and 362 districts had no enrollment.

The state average for science courses identified by the DPI as "advanced" was 8.11 percent. Mequon-Thiensville, Coleman, Monona Grove, and Stoughton were all over 50 percent. There is a sharp fall-off, then, to the 23 districts between 20 percent and 36 percent. Eighty-three were at 0 percent.

There wasn't much AP or CAPP participation in foreign language, because foreign language offerings were virtually universal as part of the regular high school curriculum during the 1992-93 school year.

Whitnall's 7.36 percent is highest among the 22 districts with AP foreign language courses. Neenah's 3.29 percent leads the dozen with CAPP courses.

The state average for enrollment in foreign language courses identified by the DPI as "advanced" was 50.24 percent, which means that half of the typical high school's student body was enrolled in at least one foreign language course during the year. Middleton-Cross Plains, Almond-Bancroft, Markesan, and Verona had participation rates between 100 percent and 125 percent. Another 20 districts reported that over 66 percent of their high schoolers took foreign languages, and an additional 75 fall between 50 percent and 66 percent. Poynette's participation rate of 528 percent — meaning foreign language occupies nearly the entire school day — seems to indicate a reporting error.

In the "Other" category (see "What went wrong?" in this section), Pittsville led the AP list at a 48.78 percent participation rate. Sixteen other districts fell between 10 percent and 25 percent, while 257 had no such offerings. Oak Creek-Franklin (70.38 percent) and Juda (60 percent) led in "other" CAPP courses. Nine other districts ranged from 10 percent to 30 percent, while 315 had no participation during the last school year.

When all the various advanced-course participation rates for the 1992-93 school year are totaled, the state average is 71.4 percent. The questionable Poynette figure of 535 percent is on top, but Mequon-Thiensville's 216 percent is probably the true leader. Eighteen additional districts ran between 100 percent and 200 percent participation.

What does it mean?

Some students who participate in advanced coursework are 7th and 8th graders. This report, however, deals only with 9th- through 12th-grade enrollment to determine participation rates. Some K-8 districts in Wisconsin offer advanced coursework opportunities through local or area high schools. At this time, however, it is difficult to reflect those numbers and locations accurately, and this report makes no attempt to report that information.

What went wrong?

Because of a collection error, the Department of Public Instruction only reported back to school districts, for use in local School Performance Reports, advanced coursework in mathematics, science, and foreign language. Not included are advanced courses (DPI-defined, AP, or CAPP) in any other areas (history, economics, art, music, etc.).

Both the number of advanced courses offered by a district and the enrollment in those courses may, therefore, be understated. This error was corrected for the statewide School Performance Report. Advanced courses other than those in mathematics, science, and foreign language are included in a column labeled "Other." All advanced courses and all advanced course enrollment is reported.

District Profile

Staffing Ratios

DISTRICT	District Staffing Ratios						
	Licensed Instruction		Administrative		Aides/Support/Other		Overall
	FTE	Pupil/ Staff Ratio	FTE	Pupil/ Staff Ratio	FTE	Pupil/ Staff Ratio	Pupil/ Staff Ratio
STATE AVERAGE OR TOTAL	**59503.13**	**13.97**	**3178.16**	**261.60**	**31678.31**	**26.25**	**8.81**

What is it?

Each year, Wisconsin school districts report their staff breakdown to the Department of Public Instruction on PI-1202, Staff Report. Staff is reported in three categories: licensed instruction, administrative, and aides/support/other.

Staff members are reported by full-time equivalency (FTE), which is employment reported as a ratio of time spent on the job divided by a standard work week (see glossary entry for detailed definition of full-time equivalency).

Staffing ratios in the School Performance Report are expressed as third Friday in September enrollment divided by staff FTE (licensed instruction, administrative, support, or the sum of all three) and expressed as a percentage.

Districts were not consistent in reporting support staff for 1992-93, because it was the first time they were asked to report in this category.

Licensed instructional staff members are teachers, subject coordinators, reading specialists, department heads, teachers-in-charge, school social workers, guidance counselors, school psychologists, physical therapists, occupational therapists, program coordinators, school nurses, librarians, library media specialists, audio-visual/technology specialists, speech/language pathologists, occupational therapy assistants, and physical therapy assistants.

Included in the administrative staff category are district administrators, assistant district administrators, business managers, directors of instruction/supervisors, principals, assistant principals, directors of human relations/multi-cultural education/equity, directors of special education and pupil services, supervisors of special education A and B, and library media supervisors.

Support staff (actually aides/support/other) includes bus drivers, clerical staff, plant operation personnel, plant maintenance personnel, cafeteria workers, educational interpreters-hearing impaired, athletic coaches, advisors to student clubs, administrative assistants, directors of transportation, directors of athletics, directors of public relations, recreation department staff, research staff, program aides, other support staff, and other professional staff in a non-educational role.

What does it say?

The overall pupil/staff ratio for Wisconsin during the 1992-93 school year was 8.81, or one staff person for approximately every nine pupils.

As one would expect, the least variation in staff ratios is for licensed instructional staff. Districts can be creative in handling administrative duties. They can also contract for some or all support services. All districts, however, must have instructional staff in numbers proportionate to enrollment.

The K-12 districts with the most pupils per licensed instructional staff person are Marinette with 18.94, Glidden with 18.63, and Oostburg with 18.04. The K-12 districts with the fewest pupils per licensed instructional staff person are Weyerhaeuser with 9.50 pupils per licensed instructional staff person, Northwood with 9.55, Phelps with 9.66, Big Foot with 9.69, and Menominee Indian with 9.76.

The K-12 districts with the smallest proportion of administrative staff are Mellen with 467, Dodgeland with 440, and Kewaunee with 440 each. The K-12 districts with the largest proportion of administrative staff are Stockbridge with 78.29 pupils per administrative staff person, Independence with 93.58, and Beecher-Dunbar-Pembine with 106.67.

The K-12 districts with the largest overall pupil/staff ratio (fewest staff per pupils served) were Oostburg with 16.94, Appleton with 14.16, Mondovi with 14.07, and Superior with 13.87. The K-12 districts with the smallest overall pupil/staff ratio (largest number of staff per pupils served) were Menominee Indian with 5.02, Weyerhaeuser with 5.94, Beecher-Dunbar-Pembine with 6.21, and Nicolet with 6.34.

What does it mean?

All districts have licensed instructional staff and administrative staff. All districts have support staff, too, but some contract for staff services and some pay for them directly. Contracted staff are not counted as employees of the district. Therefore, if a district contracts for bus, cafeteria, or clerical services, its total support staff FTE will be less than that of the district that hires and pays these service providers directly.

The licensed instructional staff ratio is of great importance to school districts because it is the largest item in the budget. Parents are also interested in this statistic, because, at the classroom level, it is a way of indicating approximately how many teachers interact with children on a day-to-day basis.

It is not possible, however, to calculate an exact number for classroom size, even if we take out all staff except teachers. Districts are different in many ways. One may choose to have larger homeroom classes and hire specialized staff (such as science, mathematics, computer science, physical education, music, and art teachers). A second district, on the other hand, may choose to put more money into counselors, social workers, and psychologists.

A district with classes that have grown slightly may choose to hire aides rather than break a classroom into two classrooms and hire an additional teacher. Another district may choose to participate in a cooperative program with a neighboring district.

In general, then, the availability of money and space and the composition of the student body will determine where a district chooses to put its resources. A small district with a homogeneous student body, for example, will be able to adequately educate pupils with fewer licensed instructional staff than a district with pupils from a wide range of socioeconomic or ethnic backgrounds who come to school with different levels of preparedness to learn.

Administrative staff numbers can also vary because of the way a district operates. A district that has supervisors who work with other staff will have more administrators than a district in which program coordinators and department heads share portions of the administrative duties. Neither the program coordinators nor the department heads are counted as administrative staff.

Because they do not directly educate pupils, administrative staff members are often perceived as extraneous. They do, however, serve such vital functions as student recordkeeping, monitoring and assessing pupil needs, and ongoing planning, development, and assessment of curriculum.

One should remember that classroom teachers need access to improved and updated instructional methods and materials and that they need guidance, encouragement, and evaluation. Teachers also need support and guidance on such day-to-day issues as discipline, health, and safety.

These are all administrative functions, and depending on the size and diversity of a school district, more or fewer administrators will be needed.

Credits Required to Graduate

DISTRICT	High School Graduation Requirements											
	English	Foreign Language	Computer Science	Math	Science	Social Studies	Fine Arts	Phy Ed	Health	Voc Ed	Electives	Total Requirements
STATE AVERAGE OR TOTAL	**4.00**	**0.00**	**0.00**	**2.00**	**2.00**	**3.00**	**0.00**	**1.50**	**0.50**	**0.00**	**8.50**	**21.50**

What is it?

The information in this section of the School Performance Report was gathered from data submitted by local school districts in the PI-1215 Curriculum Report. There were 382 districts with high school graduation requirements (the 47 K-8 districts, obviously, have no graduation requirements).

All 382 districts with high schools complied with the graduation requirements in s.118.33(1), Wis. Stats., which state that graduates must earn four credits of English, three credits of social studies, two credits each of mathematics and science, 1.5 credits of physical education, and 0.5 credits of health. In addition to these 13 required credits, the state superintendent of public instruction encourages school boards to require a minimum of 8.5 additional credits (electives) in vocational education, foreign language, fine arts, and other courses.

Administrative rule PI 18.02(3) provides a uniform definition, noting that a credit is given for successful completion of a school term of study in one course in the high school grades that meets daily for a normal class period or the equivalent established by the school board. A course is generally worth one credit if it meets for approximately 45 to 55 minutes per school day for up to 180 school days.

What does it say?

All districts complied with the four-credit English requirement in the statutes. The highest credit requirement, for five credits, was in the Washington School District. Cuba City and Brillion require 4.5 credits.

Thirty-five school districts demanded more than the mandated two mathematics credits. Ten districts call for 2.5 credits, 23 require three credits, and two — Auburndale and the Wisconsin School for the Deaf — required four credits in mathematics.

Thirty-three high schools had science requirements which exceeded the two-credit Wisconsin mandate. The most stringent requirement was four in Auburndale. Twenty-three districts require three science credits, and nine ask students to earn 2.5 credits for a diploma.

Weyerhaeuser High School was the only state school with a five-credit social studies requirement. An additional 95 districts (24.9 percent) exceed the state minimum for social studies, requiring either four or 3.5 credits.

Eighty-eight districts (23 percent) surpass the legislative requirement for physical education. Turtle Lake High School reported a 3.5 credit requirement, and Holmen and Marinette each have a three-credit requirement. Eighty-five other districts exceed the 1.5-credit state requirement.

Wisconsin law requires students to earn 0.5 credits of health education during grades 7 through 12. Data collected from the PI-1215 Curriculum Report show 26 districts (7 percent) exceed the state requirement. Boyceville High School reports a 1.5-credit health requirement, and North Fond du Lac High School requires 1.25 credits.

One high school, Laona, requires a foreign language for graduation (one credit).

Data from the curriculum report indicates that approximately 30 percent of the state's high schools require students to study computer science prior to earning a diploma. Both Beecher-Dunbar-Pembine and Glidden require 1.5 credits. Eight other school districts require a full credit: Abbotsford, Bangor, Barneveld, Columbus, Elcho, Howards Grove, Washington, and Waterloo. Another 89 districts require 0.5 credits.

The study of fine arts is an elective in Wisconsin. Thirty-three districts, however, report a fine arts requirement for graduates. Twenty of the state's high schools require one credit for a diploma, while another 13 have a 0.5-credit requirement.

Vocational education is also an elective in Wisconsin, although 58 districts have some requirement. Five districts ask two credits of vocational education: Blair-Taylor, Hortonville, Juda, Pewaukee, and Seneca. A total of 22 school districts have a one-credit requirement and another 22 require 0.5 credits.

What does it mean?

Graduation requirements range from a high of 31.5 at the Wisconsin School for the Deaf to a low of 20 at Manitowoc, Niagara, and Whitefish Bay. A total of 127 high schools (33.2 percent) require 22 credits, with another 99 (25.9 percent) requiring 24 credits for graduation.

It should be noted, however, that districts with fewer periods in a school day frequently have a lower total of required graduation credits. Conversely, districts with shorter class periods and more periods in the day would be expected to have a higher number of credits required for graduation.

Finance

Financial Information

State school districts use a uniform financial accounting system, the Wisconsin Elementary and Secondary School Accounting System (WESSAS). In the fall, every district submits a budget report of planned revenues and expenditures to the Department of Public Instruction. Membership reports are also submitted based on counts of resident children for dates during summer school and in September and January.

After the close of each school year, every district submits an annual report of final and actual expenditures and revenues. Audits of these annual reports are prepared by independent auditing firms and submitted to the DPI where they are reviewed by a staff of internal auditors.

District membership reports are independently audited at least once every four years and often more frequently. In addition, staff in the DPI's Bureau for State School Aids Administration and Consultation perform indepth reviews of both financial and membership information submitted in these reports, working closely with district staff to ensure accurate reporting.

The WESSAS organizes financial data by funds (accounting entities established for the purpose of attaining certain objectives) and by functions (activities performed to accomplish those objectives).

The General Fund is used to account for district financial activities for general, current district operational need, and represents nearly 93 percent of total school district financial activity statewide. Other funds, such as special projects, debt service, capital projects, food services, and community services, account for the remaining financial activity.

All revenues and expenditures presented in the 1992-93 School Performance Report were obtained from the general fund information of the 1992-93 school district annual reports. Data from 1992-93 are used because those are the most current numbers and are consistent with nonfinancial information presented in other sections of the document. Keep in mind, however, that the financial and membership auditing process was not complete at the time that district financial reports were produced for this publication.

For better comparability, the per-pupil figures in the School Performance Report are based on student membership, which is a pupil count adjusted for full-time equivalency. (Refer to the glossary for a full definition.)

All 427 school districts are represented, including 370 kindergarten through 12th-grade districts, 47 elementary (K-8) districts, and 10 union high school (UHS) districts. Keep in mind that the fiscal operations in K-8 and UHS districts are significantly different than those in K-12 districts.

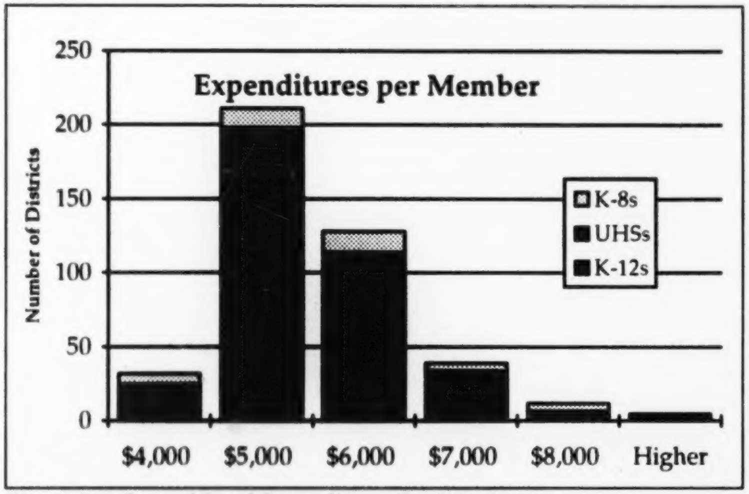

Figure 14: General Fund Expenditures Per Member.

The financial operation of the two state schools—the Wisconsin School for the Visually Handicapped and the Wisconsin School for the Deaf — are part of the DPI's biennial budget. A more detailed description of that arrangement can be found elsewhere in this document.

Each of the state's 10 UHS districts receives incoming 9th graders from several of the 47 underlying elementary districts, (Figure 15). Three of the K-8 districts overlap UHS boundaries, and the proportion of the equalized property value within the UHS district is show in parentheses.

Revenue

DISTRICT	General Aid Membership	1992-93 General Fund Revenue (Unaudited Annual Report Data)									
		Local				State		Federal		Overall	
		Property Taxes		Other			% of		% of	Total	$ per
		Dollars	% of Total	Dollars	% of Total	Dollars	Total	Dollars	Total	Dollars	Member
STATE AVERAGE OR TOTAL	809,970	2,659,677,726	54.30	124,763,233	2.55	1,990,611,421	40.64	122,785,708	2.51	4,897,838,088	6,047

School revenue comes from three general sources: local, state, and federal (Figure 16).

Local sources consist of the property tax and miscellaneous local receipts (MLR). Statewide, the property tax is the largest single source of school funding, although it may be second to general school aid in a minority of districts. The MLRs include ticket sales, fees, investment income, and gifts, and generally constitute only a small portion of local revenue.

The proportion of total local revenue to total revenue averaged 56.85 percent (54.3 percent property taxes and 2.55 percent MLRs) for the 1992-93 school year. This proportion varies widely among districts. Generally, the higher the property wealth per member the higher the percentage of local tax revenue to total revenue.

For K-12 districts, this proportion ranges from 20.38 percent at Bowler to 96.6 percent at Williams Bay. For K-8 districts, it is from 36.73 percent at Sharon J11 to 98.2 percent at Swallow. For UHS districts, the range is from 67.8 percent at Waterford to 95.85 percent at Lake Geneva-Genoa City.

Looking only at property taxes, the range for K-12 districts is from 16.31 percent in Bowler to 95.14 percent in Williams Bay; for UHS, from 64 percent in Waterford to 93.47 percent in Walworth Big Foot; and for K-8 districts, from 34.52 percent in Sharon J11 to 96.01 percent in Linn J4.

For MLRs, K-12 districts range from 0.46 percent in Milwaukee to 9.39 percent in North Fond du Lac; UHS districts, from 2.33 percent in Walworth Big Foot to 7.25 percent in Arrowhead; and for K-8 districts, from 0.4 percent in Genoa City J2 to 10.04 percent in Lac du Flambeau #1. Milwaukee is low because it charges virtually no student fees. The second lowest district is Marinette at 0.81 percent.

SPR tables indicated that the Menominee Indian School District had local revenue of only 10.41 percent (5.55 percent taxes and 4.86 percent MLR), and the Norris School District had 30.89 percent (1.39 percent taxes and 29.5 percent MLR). While these two districts have the same legal status as others in Wisconsin, they have an unusual funding system and/or membership configuration, which causes them to be treated as exceptions to normal interdistrict comparisons.

The Menominee Indian School District is coterminous with Menominee County, which is also a federal Indian reservation. Reservation status generates a much higher percentage of federal aid (29.3%) than occurs in other school districts.

On the other hand, the Norris School District is a residential treatment school with an average daily population of about 75. The school, which serves over 300 different pupils annually, is funded almost entirely from state sources and interdistrict tuition receipts.

State sources consist of state aid for education, classified as general or categorical. General aids are those that may be used for general school operations, and include equalization, supplemental or tax incremental financing (TIF), minimum, and special adjustment aids. Equalization aid, the largest single item in the state budget, and supplemental or TIF aid are funding mechanisms Wisconsin uses to equalize the revenue-raising capabilities of school districts with widely differing property-tax bases.

The amount of equalization aid that a district receives is based on a formula of sharing school costs that is driven by the amount of taxable property wealth supporting each pupil and the district's level of spending per pupil. Generally, a district receives a progressively larger percentage of equalization aid the farther its tax base (property value per pupil) falls below the level guaranteed in state statutes. In general, the more a district spends, the more state aid it gets. The state's sharing level, however, is reduced for a district with spending per pupil that exceeds a statutorily specified cost ceiling. This means that, in districts with an above-average tax base per pupil, additional spending actually reduces the amount of state aid. These principles serve to equalize available fiscal resources so that districts which spend at the same level will tax at the same rate.

While the state paid $1.607 billion of equalization and TIF aid in 1992-93, 10 percent of the state's school districts had tax bases and spending levels so high that they did not qualify for these aids. They received $15.7 million in minimum aid, a form of general aid paid to districts that do not qualify for equalization aid. It is based on the district's levy rate and the median household income of its residents. All districts receive some general aid regardless of their tax base.

Categorical aids are for specific programs or pupil populations (such as exceptional educational needs, student transportation, school lunch, or driver education) and are available to all districts that meet state standards. These aids are intended to encourage districts to provide programs for those with special needs, to offer social and psychological services, and to assist districts with low population densities or similar characteristics beyond their control. Two categorical aids—intradistrict integration (Chapter 220) and children-at-risk—are calculated using the equalization aid, but affected children are weighted to count as more than one student.

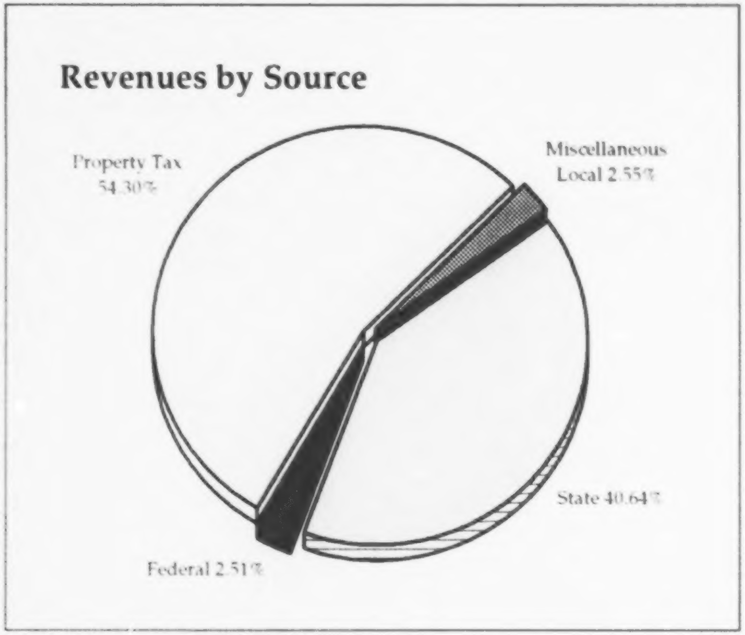

Figure 16: General Fund Revenue

More than $407 million of categorical aids were paid to school districts in 1992-93. This included $70 million for integration, $258 million for exceptional educational needs, $18 million for pupil transportation, $15 million for library aid, $8 million for bilingual-bicultural educational programs, $6 million for the pre-school to grade 5 (P-5) program, and $5 million each for state tuition and alcohol and other drug abuse (AODA) prevention programs.

In the general fund, state aid represents 40.64 percent of total revenue. This ranges from a low of 2.47 percent at Williams Bay to a high of 71.65 percent at Prairie Farm (for K-12 districts) and from 1.55 percent at Geneva J4 to 61.6 percent at Sharon J11 (for K-8 districts). The UHS districts range from 2.52 percent at Lake Geneva-Genoa City to 29.77 percent at Waterford.

Federal aid constitutes only 2.51 percent of the total revenue of the general fund. This aid is used primarily to fund programs for specific target populations, including exceptional educational needs (EEN) children, low-income pupils, and American Indian students.

The range for K-12 districts is from a low of 0.05 percent at Washington Island to a high of 19.16 percent at Bayfield. Swallow, a K-8 district, received only 0.05 percent of its revenue from federal aid, while Lac du Flambeau #1 got 39.25 percent, well above the second-highest K-8 district (Lisbon J2 at 2.59 percent). The UHS district range is from 0.43 percent at Nicolet to 5.69 percent at Lakeland. The top districts in each category get substantial federal aid for their American Indian students.

It should be noted that many districts disperse federal aid directly into the Special Projects Fund (Fund 20), which is used primarily for EEN programs.

The state average revenue per member is $6,047. High for the K-12 districts are Phelps ($8,434), Menominee Indian ($8,945), and Norris ($13,036). At the low end is Mishicot at $4,392.

UHS districts, since they run only high school programs with typically higher staff-student ratios and more extensive requirements for material and equipment, are more expensive on a per-member basis than full 13-grade programs. Per-member revenues run from $5,946 at Waterford to $11,817 in Nicolet.

Low among K-8 districts is Waterford J1 at $4,066. Three K-8 districts exceed $10,000: Fox Point J2, Maple Dale-Indian Hill, and Linn J4.

Expenditures

DISTRICT	General Aid Membership	General Fund Expenditures (1992-93 Unaudited Annual Report Data)													
		Licensed Instruction			Support Services			Transportation			Operation/Administration/Other				
		Dollars	% of Total*	$ per Member	Dollars	% of Total*	$ per Member	Dollars	% of Total*	$ per Member	Dollars	% of Total *	$ per Member	Total Dollars*	$ per Member*
STATE AVERAGE OR TOTAL	**809,970**	**3,135,899,120**	**64.25**	**3,872**	**436,635,085**	**8.95**	**539**	**234,560,946**	**4.81**	**290**	**1,073,317,531**	**21.99**	**1,325**	**4,880,412,682**	**6,025**

Expenditures from the general fund are divided into four categories: instruction, support services, transportation, and operation/administration/other (Figure 17). As with revenues, absolute numbers for any given district have little use in comparisons, but the amount spent per pupil and the spending ratios can be illuminating (Figure 14).

The four expenditure categories do not correspond directly to the categories for full-time equivalency (FTE) staffing ratios in the District Profile Tables of the School Performance Report. Definitions for the FTE staffing ratios can be found in that section of the report or in the glossary.

Instruction includes activities directly associated with interaction between staff (teachers, aides, classroom assistants, and others) and students. The expenditures for this category, while including salaries and benefits for licensed instructional staff, also includes spending for items such as supplies and equipment, textbooks, and purchased services.

Instruction consists of six major curriculum areas:

- Undifferentiated curriculum instruction takes place when a teacher provides instruction in more than one subject to the same group of pupils. It typically occurs in most elementary and some middle schools.
- Regular curriculum instruction takes place when a teacher is responsible for a single curriculum area. This typically occurs in high schools and junior high schools.
- Vocational curriculum instruction is similar to regular curriculum but deals specifically with occupational subject matter, such as agriculture, business, medical technology, drafting, and technology education courses. Experiences in this category are designed to develop knowledge and skills related to the world of work.
- Physical curriculum instruction is that body of courses pertaining to personal and public health, safety, physical education, and recreation. Driver's education is included in this area.
- Special curriculum consists of courses designed for pupils with exceptional educational needs (EEN) through specially-qualified staff. This includes curriculum for gifted and talented students and for children challenged as a result of physical, social, cognitive, cultural, or emotional conditions.
- Co-curricular activities are school-sponsored, non-credit activities, such as clubs, service organizations, student government, and team and individual athletics. Participation is generally not required. Activities that are co-curricular in one school system may be credit courses in another district.

Statewide instructional expenditures average 64.25 percent of the total. K-12 districts range from 50.84 percent at Gilmanton to 71.98 percent at Random Lake. The K-8 district range was 55.55 percent at Linn J4 to 71.4 percent at Erin #2. Nicolet had the lowest percentage for UHS districts with 50.63 percent, while Waterford had the highest with 66.25 percent.

Per-pupil instruction expenditures average $3,872 per district. For K-12 districts, the range is from a low of $2,170 at West Salem to a high of $7,200 at Norris and $5,268 at New Berlin. The lowest for a K-8 district was Waterford J1 at $2,345, while Maple Dale-Indian Hill had the highest with $6,560. For UHS districts, Union Grove was the lowest at $3,687 and Nicolet the highest at $5,958.

Support services provide administrative, technical, and logistical assistance to facilitate and enhance education. Support expenditures are in two categories:

- Pupil services, which include social workers, guidance counselors, school health personnel, school psychologists, speech pathologists, and audiology services.

- Instructional staff services, which consist of costs associated with instructional improvement, educational media, and exceptional and vocational education supervision and coordination.

The state average for general fund support services spending for 1992-93 was 8.95%. The K-12 range was from a low of 1.92% at Washington to a high of 14.49% at Norris and 13.42% at Whitnall. For K-8 districts, the range was from 2.81% at Rubicon J2 to a high of 12.87% at Walworth J1. The range for UHS districts was from 6.85% at Lakeland to 15.16% at Nicolet.

General fund support services averaged $539 statewide on a per-pupil basis. The K-12 range was from a low of $127 at Washington to a high of $1,784 at Norris and $926 at Shorewood. A low of $178 at both Silver Lake J1 and Raymond J1 to a high of $1,265 at Maple Dale-Indian Hill was the range for K-8 districts, while UHS districts ranged from a low of $457 at Waterford to a high of $1,784 at Nicolet, more than double the next highest UHS (Central Westosha at $744).

In the school accounting system, transportation is a sub-function within business administration, but it is reported separately in the School Performance Report because it varies so widely from one district to another.

Transportation is provided by Wisconsin school districts for public and private school pupils who live two or more miles from the school of attendance or less than two miles if there are hazardous circumstances.

Districts provide transportation either by using their own buses or contracting for the service. The state provides aid for four categories of transportation: regular, exceptional educational needs (EEN), summer school, and vocational. Districts may also provide transportation for extra-curricular or school-sponsored community activities, although no state aid is provided.

Regular transportation ("large, yellow," Type 1 school buses) was provided for 537,576 students during the 1992-93 school year. Milwaukee transported 51,911 students, primarily to comply with Chapter 220. This amounts to 55 percent of the district's third Friday in September enrollment. Nine districts—Cudahy, Little Chute, Nicolet, Norris, Saint Francis, Shawano, South Milwaukee, Wauwatosa, and Whitefish Bay—did not provide regular transportation during the year.

Any complete analysis of transportation costs must take pupil density into account. Wisconsin school districts vary widely in area and enrollment. Population density, therefore, will have an important impact on costs. In other words, a school with a low population density, especially if it is spread over a large area, will have a proportionally larger per-pupil transportation cost.

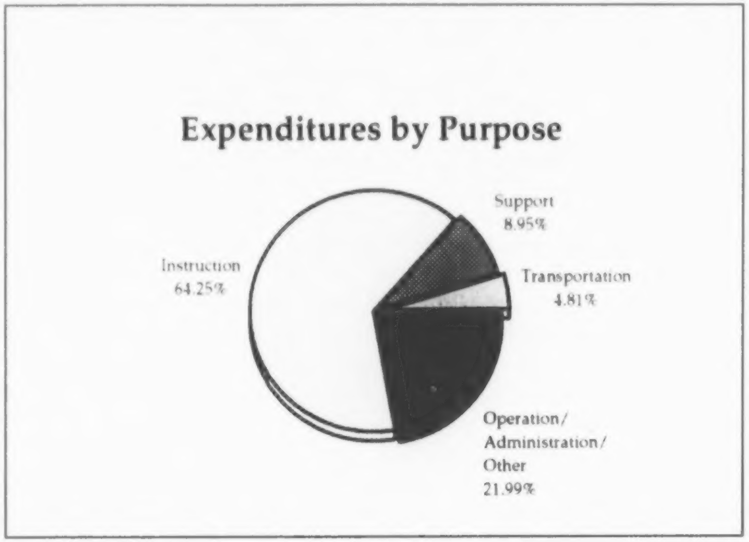

Figure 17: General Fund Expenditures

Such costs are also inflated by bad weather, which disproportionately affects districts farther north or near the Great Lakes.

As a percent of total expenditures, transportation costs were lowest in Norris (no cost) and Whitefish Bay (0.6 percent) and highest in the Maple K-12 district (11.54 percent). Among UHS districts, percentages ran from 3.13 percent in Nicolet to 7.27 percent in Lakeland. Union Grove J1, at 1.76 percent, is the lowest K-8 district, while Lac du Flambeau #1 and Minocqua J1 both exceed 10 percent.

On a per-member basis, transportation costs ranged from a low of $47 in Whitefish Bay (ignoring that Norris has no pupil transportation costs) to $819 in South Shore for K-12 districts; from $224 in

Arrowhead to $642 in Lakeland for UHS districts; and from $77 in Union Grove J1 to $873 in Lac du Flambeau #1 for K-8 districts.

Operation/Administration/Other is a multi-faceted, complex set of diverse activities, including expenses incurred by the school board, district administration, school building administration, business administration, repairs, remodeling, facility acquisition, vehicles, heating, lighting, ventilation, bonding, insurance, investments, and other fiscal operations.

This category averaged 21.99 percent of a district's general fund expenses during the 1992-93 school year. The K-12 range was from 15.22 percent at Flambeau (located in Tony) to 34.96 percent at Gilmanton. The range for K-8 districts was from 14.58 percent at Erin #2 to 33.54 percent at Linn J4. For UHS districts, the low was Waterford at 22.07 percent, while the high was Nicolet at 31.08 percent.

Wisconsin's per pupil average expenditure for administration was $1,325 per district. The K-12 range was from $795 at Campbellsport to $2,613 at Gilmanton and $2,929 at Norris. For K-8 districts, the range was from Erin #2 with $869 to Linn J4 at $3,530. The UHS range was from Waterford with $1,325 to Nicolet with $3,656.

The state average expenditure per member for all General Fund functions combined is $6,025. Not surprisingly, this is close to the average revenue of $6,047. Differences between revenues and expenditures are attributable to decisions by local school boards to either build up or draw down their operating balances or to finance certain limited activities through short-term borrowing. Borrowed money is not counted as a revenue, since it must be repaid in the following school year.

These differences are generally minimal and over the long run must average out to zero dollars. Differences can be substantial, however, in any given year. For example, Salem J7 took in $863 per member less in revenues ($5,390) than it spent ($6,253). At the other end of the scale, West Salem had revenues of $5,534 and expenditures of only $4,136, a gain of $1,398.

Expenditures per member look much like revenues per member. For K-12 districts, the low is $4,136 in West Salem, followed by $4,392 in Mishicot. The highest are Norris ($12,312), Menominee Indian ($8,827), and Northwood ($8,510). For UHS districts, the range is from $11,766 in Nicolet to $6,006 in Waterford. The elementary districts ran from $11,607 in Maple Dale-Indian Hill to $3,867 in Waterford J1.

Residential Schools

Wisconsin takes seriously its responsibility to provide educational opportunities to all children. All children don't come to school with the same abilities and needs, however. For that reason, this state tries to provide an appropriate learning environment for all students, no matter how special their circumstances. Some children with disabilities need and receive special educational services.

The Department of Public Instruction operates two residential schools for children with disabling conditions, the School for the Deaf (WSD) in Delavan and the School for the Visually Handicapped (WSVH) in Janesville. These schools represent part of the "full continuum of alternative placements" required by state and federal law and serve as an extension of the educational program offered by the state's 427 school districts.

For some students—259 during the 1992-93 school year (168 at WSVH and 91 at WSD)—the appropriate educational setting is a residential facility that offers a full range of services.

Meets Unique Needs

WSD meets the needs of hearing disabled children that cannot be appropriately met by local school districts. It addresses all of its students' needs, offering preschool (day-pupil basis only), academic, multiple handicapped, social living, and vocational education services.

WSD not only adapts standard curriculum to the unique needs of deaf and hard-of-hearing students, but the school offers special programs in communications development (sign, speech, and written expression) and cultural awareness of self and of the deaf community.

Instruction in the local public schools is available for students able to benefit from such programming. In turn, hearing students are encouraged to participate in events at WSD. A vigorous after-school activity program encompasses athletic competition and community participation.

Additionally, WSD operates summer school for remedial and diagnostic purposes, and the campus serves as a teacher-training site.

As at WSD, WSVH meets the needs that can't be met at the local school district level. The curriculum is divided into six areas: academic, vocational, music, personal management, physical education, and recreation. Within this framework, well-defined courses are offered to K-12 visually handicapped students of all ages and competency levels.

Through a cooperative program with the School District of Janesville, the WSVH offers its students access to an integrated educational program. Summer school opportunities are also available, especially for adults who have recently lost their sight. This adult-oriented program stresses personal management, interpersonal relationships, communication skills, and vocational education.

Both residential schools stress the importance of outreach to their respective communities. Services under the WSVH umbrella include low-vision clinics, preparation and distribution of educational materials for local districts, information services on visual impairments, and extensive evaluation and consultation services.

The WSD educational services center, its version of outreach, augments other services through parent-infant education, educational and vocational needs assessments, consultation services, curriculum material and resources, captioned films and professional library resources, and inservice training.

Educational Opportunities

At both schools, every effort is made to offer not only necessary special educational services but a wide variety of challenging regular educational opportunities. Therefore, administrators at DPI and the residential schools believe the numbers in this document speak for themselves. Unless otherwise noted, the accountability expected of Wisconsin's 427 public school districts is also expected of WSVH and WSD.

As happened in other school districts, some numbers were changed following finalization of the SPR data tables. Wherever possible, notes were made in the report text to point out the change. In the Climate portion of the document, no changes or explanation are needed to the data in the attendance, dropout, graduation, post-graduation follow-up, or extra-curricular activity tables.

Neither institution showed any out-of-school suspensions for the 1992-93 school year, but WSD did note, after finalization of the data, that it had three such disciplinary procedures. Because of their residential nature, it should be noted that both facilities impose out-of-school suspensions and out-of-dorm suspensions WSD had no numbers on the latter, and WSVH did not change its information.

The retention table in the School Performance Report shows two retentions for WSVH and none for WSD. Subsequent to finalization of the tables, one retention was reported by WSD.

Although unable to give the same detail that other schools reported for school-sponsored community activities, WSD did change its numbers to reflect activities for about 35 students through a variety of opportunities, including scouting, life-skill classes, and the facility's Sign Song Dancers.

Neither WSVH or WSD administer the Third Grade Reading Test because no allowances are made for handicapping conditions. Both facilities, however, test reading at the elementary level on an annual basis. No attempt was made to include these 1992-93 data in this report.

Test results tables show that no young people from the 1993 graduating class took the ACT. The WSD did say, after the fact, that three students took the test and that it was administered at the residential facility. Although the University of Wisconsin System won't waive the ACT as an entrance requirement, it does make allowances for a handicapping condition. Additionally, ACT verified that modified tests are available for students with vision and hearing problems.

No Advanced Placement test results are listed for either institution. The College Board, which administers the AP testing program, did verify that accommodations are made for visually and hearing impaired students.

Neither the WSVH nor the WSD report any students taking advanced coursework (AP, CAPP, DPI-defined, or foreign language). Both, however, recognize their obligation to offer such opportunities, whether in their own classrooms or in cooperation with a neighboring public school district.

PI-1215, the DPI's curriculum report, is set up for the hosting district to show all advanced coursework enrollment. Therefore, some students from WSVH or WSD may have been enrolled in advanced coursework but not reported at either school.

Although the graduation requirements section of the Profile tables speaks for itself, the staffing information needs clarification. In general, because WSVH and WSD are residential facilities and because of the nature of the children being served, a smaller student/staff ratio is not only expected but is essential to a successful educational experience.

Because of the nature of their missions, the fiscal operation in both schools is also handled differently than regular schools. Basically, the WSVH and WSD budgets are part of the DPI's biennial budget, and their revenues and expenditures are handled with different accounting methods. The funding of the residential schools, through the department, is from the state's general fund. Expenditures, although comparable in some areas, are necessarily different because of the nature of the institutions involved and the disabling condition of the students.

While there may be some basis for comparison of the fiscal structure of the state's residential and regular education schools, no attempt was made to force that comparability for the 1992-93 statewide School Performance Report.

What does it mean?

Because the School Performance Report is to reflect the educational opportunities afforded all children and the educational condition of all schools in Wisconsin, it needs to focus on the schools in the state that serve special populations.

By accounting for every child and every school in the state, it is hoped that DPI will be able to better address the special needs of all students whether they are in a regular school setting or in a special school setting in a district or nondistrict environment.

The School Performance Report should not be used to rank schools and school districts. It can be used, however, to compare them. In the case of Wisconsin's special student population, those comparisons can not only locate gaps in students' educational experiences but can help close those gaps to the benefit of all children.

Non-Residential Special Schools

In compliance with state and federal law—and to meet the needs of children—Wisconsin provides alternative placements for young people with special needs. For some children, the appropriate educational settings are in programs offered by a district. For others, however, those opportunities are administered by cooperative educational service agencies (CESAs) or county handicapped children's boards (CHCEBs).

During the 1992-93 school year, 158 nonresidential special educational units were operated in Wisconsin meeting the needs of 1,117 children. Services were offered for the moderately/mildly cognitively disabled, severely cognitively disabled, learning disabled, emotionally disabled, and physically disabled or with other health impairments.

A majority of these institutions were operated by school districts. The children in those facilities are reflected in the School Performance Report, although in many cases it is difficult to distinguish special schools without carefully examining the data.

Some of these institutions, however, aren't shown in the report and neither are the approximately 300 children who attend them. Some are operated by CHCEBs (such as in Brown, Manitowoc, Marathon, and Walworth counties) and others by CESAs. The 1992-93 School Performance Report only acknowledges the existence of these nonresidential special schools. No attempt is made to provide or interpret the information associated with these facilities.

It won't be enough for the SPR to just provide data for these learning experiences, because data alone won't tell the story. It will become increasingly important, to account for all children, including those in these special situations, in order to link all young people to the future we share in Wisconsin's educational goals.

Glossary

ACT–See American College Test.

Actual Days of Attendance–Number of days of face-to-face instructional contact occurred. The smallest unit of attendance is one-half day.

Administrative Staff–One of three categories of school district employees, including district administrators, assistant district administrators, business managers, directors of instruction/supervisors, principals, assistant principals, supervisors of special education (A and B), directors of human relations/multi-cultural education/equity, directors of special education and pupil services, and library media supervisors. (Also see Aids/Support/Other and Licensed Instruction.)

Advanced Coursework–Three types of courses: those offered through the College Advanced Placement Program (CAPP); those offered through the Advanced Placement (AP) program; and those courses in mathematics and science considered to be advanced by the Wisconsin Department of Public Instruction.

Advanced Mathematics–Advanced coursework in mathematics, including 124-130 Technical Mathematics; 124-330 Calculus and Analytic Geometry; 124-700 Statistics/Probability; 124-800 Trigonometry; 200-020 Advanced Placement mathematics; and 205-020 College Advanced Placement Program mathematics.

Advanced Placement Courses–Advanced coursework offered through The College Board of Princeton, New Jersey.

Advanced Placement (AP) Test–Testing program recognized by the University of Wisconsin System and many other colleges and universities as a means to obtain college credit while still in high school.

Advanced Science–Advanced coursework in science, including 126-202 Advanced Biology (second year); 126-312 Advanced Chemistry (second year); 126-322 Advanced Physics (second year); 126-402 Advanced Earth Science (second year); 126-410 Astronomy; 126-450 Aviation; 126-490 Biotechnology; 200-010 Advanced Placement (AP) Biology; 200-011 AP Chemistry; 200-012 AP Physics; 200-021 AP Computer Science; 205-010 College Advanced Placement Program (CAPP) Biology; 205-011 CAPP Chemistry; 205-012 CAPP Physics; and 205-021 CAPP Computer Science.

Aides/Support/Other Staff–One of three categories of school district employees, including bus drivers, clerical staff, plant operation personnel, plant maintenance personnel, cafeteria workers, athletic coaches, educational interpreters-hearing impaired, advisors to student clubs, administrative assistants, directors of transportation, directors of athletics, directors of public relations, recreation department staff, research personnel, program aides, other support staff, other professional staff in non-educational roles. Substitute teachers are not included in any category. (See also Licensed Instruction and Administrative Staff.)

American College Test–Test designed by the American College Testing Corporation of Iowa City, Iowa, to measure knowledge, understanding, and skills acquired during the K-12 educational experience in English, mathematics, reading, and science reasoning. The ACT is required for admission to the University of Wisconsin System and many other colleges and universities. Only students who completed the entire test are represented in this publication.

AP–See Advanced Placement test or Advanced Placement courses.

Attendance–Face-to-face instructional contact between a student and teacher.

Attendance Rate–Actual days of attendance divided by possible days of attendance and expressed as a percentage.

Average Student Score–Sum of scores received on portions of the ACT (English, mathematics, reading, and science reasoning) divided by the number of students tested. (Also see Composite Student Score.)

B-3 Program–See Birth to Three.

Birth through Age 2–See Birth to Three.

Birth to Three–Legislative name of birth through age 2 program. Comprehensive, multidisciplinary, and interagency program to serve children, birth to age 3, who are significantly developmentally delayed or diagnosed with a physical or mental condition which is likely to result in a developmental delay. Administered at the state level by the Department of Health and Social Services, with county boards designating lead agencies at the local level.

Chapter 1 Preschool–A developmentally appropriate, child-centered program that is made available to 3- and 4-year-old children living in high-poverty school attendance areas who can benefit from instruction in a school or home educational setting. The program is funded by the federal government but administered by the local school district.

Classes Offered–Total number of advanced coursework classes offered, whether or not students are enrolled.

Cohort Completed–Number of students from the 9th grade cohort who graduated with the cohort. For example, the number of students who started the 9th grade in the fall of 1989 who graduated in the spring of 1993.

Cohort Departed–Number of students leaving the 9th-grade cohort prior to graduation (transfer, death, drop out, or otherwise left school). For example, the number of students who started the 9th grade in the fall of 1989 who left prior to graduation in the spring of 1993.

College Advanced Placement Program–Advanced, college-level courses offered for college credit in conjunction with a local college or university.

Combined Rate Percentage–Students enrolled in advanced coursework divided by the third Friday enrollment in grades 9 through 12, including ungraded secondary students.

Composite Student Score–On the ACT, the weighted average of the four scores received in English, mathematics, reading, and science reasoning. The Average Composite Student Score is the sum of the composite student scores divided by the number of students tested.

Credits Required to Graduate–Wisconsin law establishes 13 credits as the minimum for graduation, including four credits of English, three of social studies, two credits each of mathematics and science, 1.5 of physical education, and 0.5 of health. The Department of Public Instruction recommends an additional 8.5 credits in elective courses.

Days Expelled–Number of school days a student misses due to expulsion during the school year, regardless of the number of expulsions. The smallest unit of expulsion is one-half day.

Days Suspended–Number of school days a student misses due to suspension (total of all suspensions). The smallest unit of suspension is one-half day.

District Staffing Ratios–The number of students enrolled in a district divided by the number of staff members (licensed instruction, administrative, aides/support/other) employed by a district.

Dollars–

- For the general fund revenue, those resources derived from local, state, or federal sources.
- For the general fund expenditures, those expenditures for licensed instruction, support services, transportation, or operation/administration/other.

Dollars Per Member–For revenues and expenditures, dollars divided by general aid membership.

Dropout–A student in grades 9 through 12 who is not attending school and should be, and who hasn't received a diploma or been granted a diploma for completion of a state- or district-approved educational program. A student is not considered a dropout if he or she meets one of the following exclusions: transfer, excused absence, imprisonment, hospitalization, or death.

Dropouts–Number of 9th through 12th graders who were dropouts on the day of the report (last day of a school year).

Dropout Rate–Number of dropouts (grades 9 through 12) divided by the third Friday enrollment (grades 9 through 12) and expressed as a percentage.

EEN–See Exceptional Educational Needs.

EEN (3-5)–Program to address the exceptional educational needs (as defined in s.115.76, Wis. Stats.) of children ages 3-5.

Enhanced ACT–See American College Test.

Enrollment–See Third Friday Enrollment, General Aid Membership, Students Enrolled, and Enrollment at Test Time.

Enrollment at Test Time–Enrollment at the time the Third Grade Reading Test is administered, typically in the spring.

Exams Passed–Advanced Placement exams with scores of 3, 4, or 5. The College Board of Princeton, New Jersey, offers AP exams and has determined a score of 3 or more is passing.

Exams Taken–Total number of Advanced Placement tests administered, including those taken by the same student at more than one time.

Exceptional Educational Needs–According to s.115.76, Wis. Stats., mental, physical, emotional, or learning disabilities which, if the full potential of a child is to be realized, require educational services to supplement or replace regular education. Services can include classroom instruction, instruction in physical education, and instruction at home or in hospitals or other institutions as needed.

EXPLORE–Statewide assessment for 8th graders (mandated by s.118.30, Wis. Stats.) in English, mathematics, reading, and science reasoning. It also contained a writing component. This test, which was voluntary for schools for the 1992-93 school year, was offered at no cost to students. It will be replaced with a new test in the 1993-94 school year. Only students who completed the entire test are represented in this publication.

Expulsions–Sanction imposed by formal school board action – as defined in ss.120.13(1)(c) and 119.25, Wis. Stats. – for purposes of discipline, which prohibits a pupil from attending school as required under ss.118.15 and 118.16, Wis. Stats.

Expulsion Rate–Number of school days missed by expelled pupils divided by the possible days of attendance and expressed as a percentage.

Extra-/Co-curricular Activities–School-sanctioned groups or events to broaden, develop, and enhance school experience in areas of academics, athletics, and music. Reported for grades 6-12, ungraded elementary, and ungraded secondary only. The group or event is not offered for credit or grade.

Federal Revenue–School district resources from federally collected sources paid as categorical aid.

Foreign Language–For purposes of the School Performance Report, all foreign language courses and enrollment are counted in the Advanced Coursework section of the document.

Full-Time Equivalency (FTE)–A person's employment in a school district expressed as a ratio of time spent on the job divided by a standard 40-hour work week. For example, a kindergarten teacher with only morning classes would be 0.5 FTE.

General Aid Membership–School or district resident enrollment adjusted for student full-time equivalency (for example, 3-year-old early childhood student counts 0.5 FTE).

General Fund Expenditures–Spending (also known as Fund 10) in four categories: licensed instruction, support services, transportation, and operation/administration/other. Expenditures not included are Special Project Fund (Fund 20), Debt Service Fund (Fund 30), Building Fund (Fund 40), and Food Service Fund (Fund 50).

General Fund Revenues–Resources, used to finance General Fund operations of a school district, from three sources: local, state, and federal. (See also Local Revenue, State Revenue, and Federal Revenue.)

Graduates–Students who complete the prescribed course of study established by a local school district. Districts can also issue graduation diplomas for successful completion of a school-sponsored general education development (GED) program or attainment of the high school equivalency diploma (HSED).

Graduation Rate–Number of graduates in the spring of a school year divided by number of 12th graders enrolled on the third Friday in September of the same school year and expressed as a percentage.

Head Start–A comprehensive education program for children ages 3-5 whose families meet federal poverty guidelines. This program includes education, health and developmental screening and services, nutrition and mental health services, and social, education, and support services for adults.

In-School Suspension–Exclusion from a regular classroom situation (not from school) for purposes of discipline (not a required entry in the School Performance Report).

Leaver–Student who left school prior to graduation but hasn't formally dropped out, including students who are deceased, have transferred to another district, have enrolled in a private school or home-based program, have been adjudicated delinquent, or have left school for health reasons (not a required entry in the School Performance Report).

Licensed Instruction–Total of expenditures for undifferentiated, regular, vocational, physical, special, and co-curricular instruction.

Licensed Instructional Staff–One of three categories of school district employees, including teachers, subject coordinators, reading specialists, department heads, teachers in charge, school social workers, guidance counselors, school psychologists, physical therapists, occupational therapists, program coordinators, school nurses, librarians, library media specialists, educational audiologists, audiovisual/technology specialists, speech/language pathologists, occupational therapy assistants, and physical therapy assistants.

Local Revenue–School district resources from either property taxes or other local sources (fees, interest payments, insurance refunds, etc.).

9th Grade Cohort–Enrollment of a school's graduating class four years prior to graduation. For example, the students in the class of 1993 who were enrolled in the fall of 1989.

Number of 12th Graders–Third Friday enrollment of 12th graders.

Offerings–Groups, events, or activities used in both extra-/co-curricular and school-sponsored activities.

Operation/Administration/Other–Total of expenditures for general, school building, and business administration; central services; insurance and judgments; other support services; and non-program transactions.

Out-of-School Suspensions–Exclusion from school imposed by the district for disciplinary reasons.

Participants–A count of students taking part in separate extra-/co-curricular or school-sponsored activities. It is common for students to participate in more than one activity, in which case they are counted more than once.

Participation Rate–Number of participants divided by the third Friday enrollment, as used in both extra-/co-curricular and school-sponsored activities.

Percent Above Standard–Percent of students taking the Third Grade Reading Test who scored above the performance standard (that is, from 28 or more of a possible 40).

Percent Below Standard–Percent of students taking the Third Grade Reading Test who scored below the performance standard (that is, 21 or less of a possible 21).

Percent Enrollment–Students enrolled in an advanced course divided by the 9th- through 12th-grade third Friday enrollment.

Percent Inconclusive–Percent of students taking the Third Grade Reading Test whose score relative to the performance standard was inconclusive (that is, from 22 through 27 of a possible 40).

Percent of Students Tested–

- For the Third Grade Reading Test (TGRT), the number of students tested divided by third-grade enrollment at test time.
- For the Enhanced American College Test (ACT), the number of students tested divided by 12th-grade third Friday enrollment.

Percent of Total–

- For the general fund revenue, dollars (resources in a specific category) divided by total revenues (all general fund resources).

- For the general fund expenditures, dollars (expenditures in a specific category) divided by total expenditures (sum of general fund expenditures).

Percent Passed–Number of Advanced Placement tests passed divided by the number of exams taken.

PLAN–Statewide assessment for 10th graders (mandated by s.118.30, Wis. Stats.) in English, mathematics, reading, and science reasoning. This test, which was voluntary for schools for the 1992-93 school year, was offered at no cost to students. It will be replaced with new test for 10th graders for the 1993-94 school year. Only students who completed the entire test are represented in this publication.

Possible Days of Attendance–Number of days of face-to-face instructional contact that could occur in the school calendar. The smallest unit of attendance is one-half day.

Postgraduation Follow-up–Intentions of 12th graders when surveyed prior to graduation. The percent selecting each option is determined by dividing the number naming that option by the total number of graduates.

Pupils Expelled–Number of students expelled during the school year. An expelled student is counted only once regardless of the number of expulsions. The percent of pupils expelled is the number of pupils expelled divided by third Friday enrollment and expressed as a percentage.

Pupils Suspended–Number of students suspended during the year. A suspended student is counted only once, regardless of the number of suspensions. The percent of pupils suspended is the number of pupils suspended divided by the third Friday enrollment and expressed as a percentage.

Pupil/Staff Ratio–Third Friday in September student enrollment divided by staff full-time equivalency (licensed instructional, administrative, aides/support/other, or the sum of all three) and expressed as a percentage.

Required Community Activity–See School-Sponsored Community Activity.

Retentions–Students not making sufficient progress in a prescribed course of study who, by local school district policy, must either repeat a grade or need additional time to complete the prescribed program. Retentions are reported for all grades except Birth through Age 2, EEN for Ages 3-5, Chapter 1 Preschool, Head Start, and 4-Year-Old Kindergarten.

Retention Rate–Number of retentions at the end of a school year divided by third Friday enrollment and expressed as a percentage.

School-Sponsored Community Activities–School-sponsored or supervised events that emphasize service to and involvement with the community. They may be:

- Required: Activity is mandatory or a grade or credit for graduation is given.
- Voluntary: Activity is not mandatory and no grade or credit for graduation is given.

State Revenue–School district resources from state-collected sources, such as income or sales taxes, paid as general or categorical aid.

Students Enrolled–Student enrollment in advanced courses, with each student counted as many times as he or she is enrolled in an advanced course.

Students Taking Exams–Number of students taking one or more Advanced Placement exams, although each student is counted only once.

Students Tested–

- For the Third Grade Reading Test (TGRT), the number of students taking the test. Excluded are those absent during the testing period or excused due to exceptional educational needs (EEN) or limited English proficiency (LEP).
- For the Enhanced American College Test (ACT), the number of members of a graduating class who took the test either as juniors or seniors. A student taking the test more than once is counted only once, and the most recent score is used.

Support Services–Total of expenditures for pupil services (such as psychology, social work, and nursing) and instructional services (such as curriculum development and inservice training).

Suspensions–Number of disciplinary suspensions ordered in a year. If a student is suspended more than once, all of the suspensions are counted. (See also In-School and Out-of-School Suspensions.)

Suspension Rate–Number of days suspended divided by possible days of attendance and expressed as a percentage.

TGRT–See Third Grade Reading Test.

Third Friday Enrollment–Number of students eligible to attend class on the third Friday in September, whether or not those students are in attendance.

Third Grade Reading Test–Statewide test (mandated by s.121.02(1)(r), Wis. Stats.) to be administered to 3rd graders, including those attending charter schools.

Total Dollars–

- For the general fund revenue, the amount of revenue raised from local, state and federal sources.
- For the general fund expenditures, the amount of general fund expenditures (total of licensed instruction, support services, transportation, and operation/administration/other).

Transportation–Total expenditures for pupil transportation.

Ungraded Elementary–Students at the K-8 grade level who are not assigned to a specific grade for instructional purposes. These are generally exceptional educational needs (EEN) students with individual education programs (IEP).

Ungraded Secondary–Students at the 9-12 grade level who are not assigned to a specific grade for instructional purposes. These are generally exceptional educational needs (EEN) students with individual education programs (IEP).

UE–See Ungraded Elementary.

US–See Ungraded Secondary.

Voluntary Community Activity–See School-Sponsored Community Activity.
